Upgrade now for the future

HP Upgrade & Migration Services for SAP

Improve the value you realise with SAP.

Insights

- Leverage an upgrade and migration programme that enables you to renovate SAP solutions to extend business value.

- Accelerate your upgrade using best practices and tools delivered from HP IDS centres.

- Get a one-stop shop for all your upgrade and migration needs.

Companies are challenged to implement innovative solutions to meet ever-changing business needs. Unfortunately, many have not upgraded their SAP® application platform in a number of years. These upgraded platforms provide you with new functionality and features that make developing innovative solutions possible.

Take advantage of the latest and greatest SAP application features by upgrading your system to the latest SAP version. This enables you to:

- Measurably invest in a platform that enables accelerated business growth

- Reduce total cost of ownership (TCO)

- Minimise business risk

Do it quickly and easily

Simplify all your upgrade and migration needs. Leverage a proven methodology that can combine the following:

- Migrate to a new infrastructure

- Upgrade your current SAP software— major release or enhancement pack

- Migrate and/or upgrade your database and operating system

- Implement a unicode conversion

With HP, you can do as much as you want, when you need to, at the pace you require.

Accelerate business growth

Measurably invest in a platform that enables you to accelerate business growth.

- Streamline and save on investment costs to focus on industry- and technology-driven innovation—take advantage of someone else's investment in technology.

- Renovate SAP solutions to extend the business value to grow more profitably.

- Upgrade at a pace that makes sense for your business—it doesn't all need to be done at the same time.

Reduce TCO

Upgrading and/or migrating your SAP system can reduce your TCO by:

- Lowering the cost of operations by removing unused transactions, cleaning up custom code, consolidating instances, and reducing hardware costs

- Decreasing integration or maintenance costs through new technology innovation

- Lowering maintenance costs—by using versions in compliance with SAP's roadmap

Reduce risk

Renew your SAP environment by upgrading and migrating to a new infrastructure—options such as traditional infrastructure, virtual private cloud solutions, or SAP as a Service—reduce your business risk.

- Decrease the need for complex custom code, ensure you are on current recommended SAP versions, and your business units are on the same systems.

- Reduce or eliminate critical business downtime during the upgrade and/or migration by leveraging a proven methodology.

- Gain a common growth platform across unintegrated business units and applications.

Gain business value

HP has performed numerous successful SAP upgrades and migrations for our clients. We bring a:

- Tailored "factory" approach to SAP upgrade and migration projects, significantly reducing risk, time, and budget requirements for upgrades

- Delivery model that includes an optimised mix of best shore resources, plus a unique suite of software tools and methodologies

Make the right decision

Making an informed decision to upgrade or migrate your system is critical to your organisation's success. Let HP help by performing an upgrade or migration assessment. We bring the right resources and tools to assess your current SAP environment. After the assessment, you receive recommended options and a roadmap to support your business growth—now and in the future.

See SAP experience at work for you

We have decades of SAP experience and plenty of credentials to upgrade and transform your SAP environment.

- With more than 9400 SAP professionals, HP has one of the largest and most comprehensive portfolios of SAP Services.
