

HPE 3PAR StoreServ Online Import Quick Start Service

HPE Packaged Consulting Services

HPE 3PAR StoreServ Online Import Quick Start Service is a consultative service that is designed to harness the power of your new storage array, fully leveraging HPE Pointnext expertise and HPE best practices. This service is a fixed-scope, fixed-price engagement designed to help you accelerate the process of migration while reducing cost and time.

HPE 3PAR StoreServ Online Import is a native HPE 3PAR feature and a licensed software component of the HPE 3PAR OS. The current list of supported source storage systems is provided in a support document which can be found at the following URL: hpe.com/storage/spock.

An HPE consultant will configure and integrate your new HPE 3PAR StoreServ system in preparation for data migration using HPE 3PAR StoreServ Online Import. An HPE consultant will migrate a representative set of host data, agreed to with you prior to service delivery, from the existing storage array to the new HPE 3PAR StoreServ system using HPE 3PAR StoreServ Online Import and provide specialist knowledge transfer throughout the engagement.

The Quick Start service methodology includes a discovery phase, which is followed by a configuration phase, migration phase with on-site or remote HPE best practice configuration and planned data migrations. The service provides a HPE 3PAR StoreServ specialist to work with you for execution of both configuration and migrations along with specialist knowledge transfer throughout.

Our consultant will initiate the services engagement with a discovery phase, supported by documentation that will detail required prerequisites so you can verify that your existing storage system meets the support requirements for HPE 3PAR StoreServ Online Import. During this phase, we will help you identify any gaps that you need to address in order for you to meet the prerequisites before commencing a migration.

After verifying prerequisites have been met, HPE will configure HPE 3PAR StoreServ Online Import in line with HPE best practices. Once the configuration is complete, HPE will plan the migrations with you and your teams, outlining the steps involved in order to execute the data migration. During the configuration and migration phase you will be able to leverage the HPE consultant for knowledge transfer.

Finally, HPE will complete the engagement with addressing post migration activities as described below. If you wish to proceed with additional migration activities or engage HPE pointnext for a wider migration project you will need to purchase extra services available at an additional charge. This service can be leveraged to help migrate data to a new HPE 3PAR StoreServ array with several online and offline options, which is intended to allow your business continue running with minimal disruption.

Service benefits

- Provides and implements HPE best practice configuration
- Provides an HPE 3PAR StoreServ specialist on-site or remote for the duration of the configuration and migration execution
- Designed to ensure successful migrations through use of HPE methodologies and experienced HPE storage professionals
- Leverages HPE 3PAR StoreServ trial licensing provided with every new HPE 3PAR StoreServ system
- Can help you determine a migration strategy that can be rolled out for further migrations
- Provides specialist knowledge transfer

Service feature highlights

The HPE 3PAR StoreServ Online Import Quick Start Service includes four phases:

- Discovery phase
- Configuration phase
- Migration phase
- Post-migration phase

Table 1. Service features

Feature	Delivery specifications
Discovery phase	<p>During the discovery phase service planning occurs in collaboration with the Customer remotely. As part of the service planning process, HPE will:</p> <ul style="list-style-type: none"> • Collect the information (via a phone call with the Customer) needed to identify and assess the existing storage environment prerequisites for these services. The source storage system make, model and operating system must be supported according to the latest HPE 3PAR StoreServ Online Import and Peer Motion Compatibility Matrix • Provide all support documentation to the Customer for verification of firmware specific support with HPE 3PAR StoreServ Online Import • Review and assess information provided by the Customer prior to the on-site or remote delivery, if applicable • Provide details of any gaps in relation to the support of existing hosts, storage systems, and HPE 3PAR StoreServ Online Import • Discuss in detail the Customer responsibilities and any actions required by Customer to meet service prerequisites • Discuss out-of-scope activities, where applicable
Configuration phase	<p>During this phase, HPE consultants use HPE configuration best practices to setup the existing storage system and new HPE 3PAR StoreServ system for Online Import:</p> <ul style="list-style-type: none"> • HPE 3PAR StoreServ system has Fibre Channel ports configured and dedicated for use with Online Import, known as "Peer Ports". • SAN Zoning will be setup along with the customer from the source storage system to the new HPE 3PAR StoreServ system. • Configuration of any management tools required for the integration between HPE 3PAR StoreServ Online Import and source storage system. E.g., Command View EVA, SMI-S provider, Online Import Utility. • Provide specialist level knowledge transfer to the customer along with any supporting documentation during all the phases of service delivery. This knowledge transfer is intended to be part of the service delivery with the customer providing resources during the process as a way to learn it.
Migration phase	<p>Migration phase includes planning the migration of the pre-defined source system to the new HPE 3PAR StoreServ system and execution of these migrations using HPE 3PAR StoreServ Online Import. HPE will:</p> <ul style="list-style-type: none"> • Review the existing source storage system identified as in scope for HPE 3PAR StoreServ Online Import migration. • Determine the appropriate list of hosts with attached storage that will be migrated to the new HPE 3PAR StoreServ. • Plan the migration with the customer as online, minimally disruptive or offline. Discuss rollback plan if required. • Apply HPE design best practices regarding thin provisioning, thin persistence, deduplication and destination CPG in line with customer requirements. • Migrate data and transfer systems from the source array to HPE 3PAR StoreServ using HPE 3PAR StoreServ Online Import. • Provide specialist level knowledge transfer through Customer's participation in the migration process to learn basic features and functionality of HPE 3PAR StoreServ Online Import. • Post migration verification of systems and applications should be performed by the customer. • An HPE service delivery specialist will run the appropriate migration verification tests required for this service.
Post-migration phase	<p>The post migration phase is the final phase to be completed after the completion of the configuration and migration phases. During this phase, HPE will:</p> <ul style="list-style-type: none"> • Remove any tools or configuration not required by the customer after the engagement has ended • Remove any zoning configuration used for the engagement if they are no longer required • Reconfigure the "Peer Ports" as standard "Host Ports" if required and documented in the agreed migration plan • Discuss any potential further storage and data migration activities where the Customer may require assistance from HPE Technology Consulting Services

Service limitations

This service is to be fulfilled for a single Customer location on a single HPE 3PAR StoreServ system.

This service is delivered by no more than one HPE consultant on-site or remote.

Delivery of these services will not exceed five consecutive days including travel time to and from the customer site.

For on-site delivery this service includes a maximum of one trip including up to 8 hours travel time to the Customer location (includes configuration, migration, and cleanup/close) after initial discovery is completed via teleconference and email communication with the Customer.

This service feature does not include installation and startup of the new HPE 3PAR StoreServ system. These services are available for an additional charge and can be purchased separately from HPE.

Services will be delivered during standard local HPE business days and hours, excluding HPE holidays.

HPE's ability to deliver this service is dependent upon the Customer's full and timely cooperation with HPE, as well as the accuracy and completeness of any information and data the Customer provides to HPE.

Remote delivery will be completed by a dedicated HPE 3PAR StoreServ specialist for the duration of service delivery.

Contact an HPE service specialist within 120 days of date of purchase to schedule the delivery of the service.

Services such as, but not limited to, the following are excluded from this service:

- Backup, recovery, and support of the operating system, other software, and data
- Any restoration/recovery of compromised data
- Application integration or integration of third-party products or peripherals not included in the system
- Any services not clearly specified in this document
- Support for network-related problems
- Services that, in the opinion of HPE, are required due to unauthorized attempts by non-HPE personnel to install, repair, maintain, or modify hardware, firmware, or software
- This service will not migrate "complex" configurations such as clusters, Oracle RAC, file servers
- This service does not redesign existing storage configurations and will be based on a like for like volume configuration

Service eligibility

- To be eligible to purchase this service, the Customer must have an HPE 3PAR StoreServ system with the required HPE 3PAR StoreServ Online Import license active for the duration of the engagement.
- The Customer must meet all service prerequisites as identified in the Discovery phase prior to any service delivery.
- The Customer's existing storage system must be supported and running a firmware version compatible with HPE 3PAR StoreServ Online Import (this detail is provided during the discovery phase).
- The Customer's existing computing operating system platform(s) must be supported by the array being installed.
- The Customer must install any recommended host patching or software upgrades, including device drivers and firmware.
- The Customer must provide a suitable physical infrastructure for the HPE 3PAR StoreServ system to enable physical connectivity as required, including implementation of any recommendations made by HPE as a result of the site inspection.
- When an existing system or environment into which a product is to be installed under the terms of this service is not covered by a current HPE service contract, a pre-installation inspection, plus additional work as needed to return the system or environment to a supported configuration, may need to be carried out at an additional charge before the installation can be performed.

Customer responsibilities

To maximize the effectiveness of our consulting service, the Customer will:

- Allow HPE full and unrestricted access to all locations where the service is to be performed
- Ensure that all the information provided to HPE for this service has been fully detailed and is accurate
- Allow HPE personnel full and unconditional access to all software products to be supported; if security restrictions apply to any supported systems, the Customer may be required to assume additional responsibilities for maintaining the system and software
- Adhere to licensing terms and conditions regarding the use of any HPE service tools used to facilitate the delivery of this service, if applicable
- Adhere to the licensing terms and conditions as stated by the original software manufacturer or sales agent
- Assign a designated person from the Customer's staff who, on behalf of the Customer, will grant all approvals; provide information; ensure that all hardware, firmware, and software that the HPE service specialist will need in order to deliver this service are available and that software products are properly licensed; and otherwise be available to assist HPE in facilitating the delivery of this service
- Provide a suitable work area for delivery of the service, including access to an outside telephone line, power, and any network connections required
- Provide all information necessary for HPE to deliver timely and professional remote service
- Ensure that all service prerequisites as identified in the Discovery process have been met
- Provide HPE consultants with all the architectural diagrams that were previously designed for storage
- Be responsible for registering to use HPE electronic facility in order to obtain software product information and to download HPE software patches
- Be responsible for all data backup and restore operations
- Provide any third-party products required, e.g., MPIO software
- Install customer-installable firmware updates and patches prior to service delivery
- Use all software products in accordance with current HPE software licensing terms corresponding to the Customer prerequisite underlying software license, or in accordance with the current licensing terms of the third-party software manufacturer, if applicable, including any additional software licensing terms that may accompany such software updates provided under this service

The Customer is responsible for the security of the Customer's proprietary and confidential information. The Customer is responsible for properly sanitizing or removing data from products that may be replaced and returned to HPE as part of the repair process to ensure the safeguarding of the Customer's data. For more information on Customer responsibilities, including those outlined in HPE's Media Sanitization Policy and Media Handling Policy for Healthcare Customers, go to hpe.com/mediahandling.

General provisions/Other exclusions

- To the extent HPE processes personal data on the customer behalf in the course of providing services, the HPE Data Migration Services—Data Privacy and Security Agreement found at hpe.com/mediahandling shall apply.
- Services required due to causes external to the HPE-maintained hardware or software are excluded from this service.
- Any services provided outside of HPE standard business hours may be subject to additional charges.
- Please check with a local HPE authorized representative to find out whether a specific location is eligible for this service.
- HPE reserves the right to charge, on a time and materials basis, for any additional work over and above the service package pricing that may result from work required to address service prerequisites or other requirements that are not met by the Customer.

Ordering information

To obtain further information or to order HPE 3PAR StoreServ Online Import Quick Start Service, contact a local HPE sales representative.
