Hewlett Packard Enterprise

HPE and Centrify

HPE NonStop Systems & Centrify Infrastructure Service

Working together. Accelerating results.

A new style of partnering

Hewlett Packard Enterprise and Centrify are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, Centrify is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

Centrify has access to the right tools, processes, and resources to help our joint customers accelerate innovation and

transformation that brings value, achieves business needs, and increases revenue and market share.

Product overviews

Centrify Infrastructure Service: Today's organization must control access to hybrid infrastructure, enforce individual accountability, and consistently control privileged access to both on-premises and remote users while improving IT productivity. Implementing a least privilege access model, securely managing shared privileges, and associating privileged activity to an individual are at the root of reducing threats, intentional or not. Centrify Infrastructure Services minimizes the attack surface and controls privileged access to the hybrid enterprise with identity assurance, just-in-time and just enough privilege, and advanced monitoring. Infrastructure Services increases security

and accountability by enabling IT to ensure users are who they say they are because they log in as themselves with multi-factor authentication, govern privileged access through roles and approval workflows, and associate all privileged activity to an individual with shell and process level monitoring. Centrify Infrastructure Service integrates with HPE NonStop by combing shared account password management with the ability to securely manage and audit access by IT. The net result is increased security when sharing privileged accounts, simplified compliance, as well as secure remote access to on-premises and cloud-based infrastructure.

HPE NonStop: For business that never stops. HPE Integrity NonStop was designed from Day One with built-in clustering and workload balancing to enable withstanding single points of failure so applications continue as if no failure occurred. That means no disruption of work, no impact on customers and no degradation in performance. For almost four decades, the HPE Integrity NonStop architecture remains the ideal choice when there is a need for reliable uninterrupted availability—in compute environments that serve mission critical businesses.

HPE NonStop scales up to 16 HPE NonStop CPUs and 6 cores per CPU within a single node, each running its own copy of the HPE NonStop OS, and scales out to 4,080 HPE NonStop CPUs on 255 networked nodes or 24,480 cores.

HPE NonStop comes with a built-in transactions management framework that ensures full data integrity. Support for modern languages, interfaces and Eclipse based environment makes applications development faster, easier, and more efficient. HPE NonStop also comes with modern security algorithms and encryption technologies.

Company overview

About Centrify
Power Next Dimension Security with Centrify Identity Services. Designed for the hybrid enterprise, Centrify Identity Services is built from the ground up to protect against the leading point of attack for cyber threats and data breaches—compromised credentials. Our services secure every user's access to apps, endpoints and infrastructure through single sign-on, risk-based multi-factor authentication and privileged access security. Centrify provides full identity security for employees, customers,

partners, privileged IT admins, and outsourced IT. Secure access to the boundaryless hybrid enterprise through the power of identity services. Taking the future of security forward with the best of Privileged Identity Management and Identity-as-a-Service, led by a team with decades of experience redefining security. The industry's first cloud-based privileged access security solution.

Centrify strengthens enterprise security by managing and securing identities from cyber threats. As organizations expand IT resources and teams beyond their premises, identity is becoming the new security perimeter. Over 5000 customers, including half of the Fortune 50 and over 80 federal agencies, leverage Centrify to secure identities.

About Hewlett Packard Enterprise
Hewlett Packard Enterprise is an industry-leading technology company that enables customers to go further, faster. With the industry's most comprehensive portfolio, spanning the cloud to the data center to workplace applications, our technology and services help customers around the world make IT more efficient, more productive, and more secure.
