

HPE and Trinetra Wireless

HPE Universal IoT Platform & Trinetra

Working together. Accelerating results.

A new style of partnering

Hewlett Packard Enterprise and Trinetra Wireless are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, Trinetra Wireless is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

Trinetra Wireless has access to the right tools, processes, and resources to help our

joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

Product overviews

Trinetra: Trinetra is an award winning product that uses cutting-end software technologies and integrating intelligent hardware design to bring you the highest quality of **Fleet Management, Mobility, and IoT solutions.**

An extensive level of configuration and customization are Trinetra's forte, since both the Hardware design & manufacturing along with Application design, architecture and development are under one roof. The application adopts a modular and multi-tenant design, which makes it very flexible for our customers. The mobile app also provides instant access for users on-the-move.

Product Brochure

Seamless integrations with HPE Universal IoT Platform has resulted in various complex solutions being implemented at a quicker pace. Our intelligent product platform brings in the necessary Location Based Services, IoT data analysis, KPIs, and relevant dashboard, which enables quick decision making.

Trinetra is delighted to be associated with HPE and committed towards a long-term partnership with the joint goal of providing enterprise-level niche solutions.

HPE Universal IoT Platform: The HPE Universal IoT Platform enables connection and information exchange between heterogeneous IoT devices and IoT applications. In doing so, it reduces dependency on legacy silo solutions and dramatically simplifies integrating diverse devices with different device communication protocols. On top of ubiquitous connectivity, the HPE Universal IoT Platform provides federation for device and service management, and data acquisition and exposure to applications. Using our platform, clients such as public utilities, home automation, insurance, healthcare, national regulators, municipalities, and numerous others can realize tremendous benefits from consolidating data that had been previously unobtainable.

The HPE Universal IoT Platform has been architected from its inception, to be aligned with oneM2M, starting with release 1 and has evolved to meet the standards defined in release 2. Through the adoption of the oneM2M model, HPE Universal IoT Platform is able to support multiple industry-specific use cases supported on the same horizontal platform. There are almost no limitations to the type of underlying connectivity or to the vertical or industry being addressed. Through the HPE Universal IoT Platform devices are registered and managed in a way that enables the exposure of their capabilities to enterprise applications subscribing to notifications on the northbound side of the platform based on standard, future proof, sustainable interfaces and protocols.

Company overview

About Trinetra Wireless

An innovative technology driven product firm specializing in IoT & Location Based Services. A world-class embedded engineering and software development center in India and an advanced research & development center in Canada are fueling the objective of Trinetra to be a leading product firm providing specialized solutions to real-world complex issues.

Over the past few years, Trinetra has successfully demonstrated proven domain expertise in Fleet Management, Mobility, and IoT solutions. A comprehensive portfolio of solutions has resulted in implementations over 15+ countries across various industry verticals.

Trinetra has successfully partnered with large service providers and system integrators providing consulting, services, and integration expertise to deliver comprehensive solutions for medium to large enterprises.

The focus is on creating value addition and faster Return on Investment by aligning to a very customer centric approach. Specialized solutions & integrations offered by Trinetra contribute a long way in satisfying industry-specific business requirements.

About Hewlett Packard Enterprise

Hewlett Packard Enterprise is an industry-leading technology company that enables customers to go further, faster. With the industry's most comprehensive portfolio, spanning the cloud to the data center to workplace applications, our technology and services help customers around the world make IT more efficient, more productive, and more secure.
