HPE Small Business Solutions for Virtualization with VMware

Consolidate more workloads onto a single server with reliable performance

How can virtualization help you?

- **Enhance efficiency and productivity** by reducing deployment and maintenance time, along with the risk of downtime.
- **Reduce costs** for hardware, power, and cooling by consolidating workloads onto fewer servers.
- **Run applications** like payroll, accounting, and productivity more efficiently.

500,000
customers

rely on VMware virtualization and cloud solutions across all industries and company sizes worldwide.¹

More capacity—less complexity

Small and midsize businesses face unique IT challenges. For example, you're probably running your entire company using just a few applications—and you need to be sure they are available and perform well. But reliable business technology with adequate capacity can be complex and expensive.

Virtualization is a technology that lets you run more applications more reliably and with better performance, so you can have multiple applications on a single server—like accounting, productivity, and payroll apps—helping you do more with less while still managing the growing number of workloads you rely on to run your business.

Simple, secure, and affordable virtualization

HPE Small Business Solutions for Virtualization with VMware® give you the performance you need with the ability to scale capacity more easily to accommodate a growing number of apps and users. These simple, secure, and affordable solutions are built on **HPE ProLiant servers**, powered by Intel® Xeon® processors and optimized and validated to run VMware.

¹ VMware, "VMware Solutions for Small and Midsize Businesses," October 2013.

Solution brief

HPE Small Business Solutions have been validated and optimized for each workload use case.

² Based on external firm conducting cyber security penetration testing of a range of server products from a range of manufacturers, May 2017. Does not apply to HPE MicroServer Gen10.

³ Veeam is an optional service that may incur additional costs.

⁴ Depending on the model.

⁵ HPE SMB Offers are regionally released as "Smart Buy Express Offers" in the U.S. and Canada, "Top Value Offers" in Europe, and "Intelligent Buy Offers" in Asia Pacific and Japan.

⁶ VMware subscriptions are sold and supported by HPE. Visit the [product page](#) and the [download page](#) for more details.

⁷ Subject to minimum commitment.

Better together

HPE Small Business Solutions for Virtualization with **VMware** are:

- **Secure**—Protect against attacks and quickly recover from unplanned downtime with built-in security features that make HPE ProLiant Gen10 the world's most secure industry-standard servers.² VMware provides multiple security features for the virtualization layer, virtual machines (VMs), and the virtual networking layer. You also have the option of adding Veeam® Backup & Replication to your solution for fast, flexible, and reliable backup and recovery of virtual, physical, and cloud environments from a single management console.³
- **Simple**—HPE Small Business Solutions are a one-stop shop and include preconfigured hardware and software,⁴ making them easy to deploy. And HPE ProLiant servers include automated intelligence that reduces the time and skills required for deployment and management. VMware gives you built-in virtualization management, designed to keep technology out of your way while putting IT at your service.
- **Affordable**—Low-cost HPE Small Business Solutions make Hybrid IT easy to consume.⁵ And **HPE Subscription** offers a worry-free, flexible option that packages best-in-class hardware, software, accessories, and services into a predictable monthly payment.⁶

Expect more

HPE Small Business Solutions for Virtualization with VMware help you adopt virtualization with confidence.

- **Robust platform**—A cost-effective, scalable virtualization platform that reduces complexity and increases agility.

- **Economic control**—Pay per use for IT and scale on demand more economically with **HPE GreenLake Flex Capacity**.⁷

- **Focus on your business**—Gain the ability to respond quickly and flexibly to changing trends and increasing workloads.

HPE Pointnext has the expertise and experience to help you simplify operations and easily extend your IT staff, helping them do more with less. HPE Pointnext services help you innovate to keep ahead of risks like competitive and security threats. A variety of offerings—from advising on best practices and project-based engagements, to operational support services—keep your environment running efficiently and reliably. HPE Pointnext 24x7 technical support services are included with HPE VMware 1-, 3-, and 5-year licenses.

Build your best solution

With your choice of HPE ProLiant tower or rack servers with VMware you can easily adopt affordable virtualization, with options that support one to sixteen VMs. Contact HPE or your authorized Channel Partner to find out more, today.
