

A prescriptive approach to mass migration with AWS

MOC

Figure 1. MOC benefits

The MOC is a dedicated migration factory that operates 24x7 and leverages custom IP, automation, and tooling to migrate applications at scale.

MOC benefits

- Faster time to market
- U.S.-based team and location
- Centralized migration management
- Reduced migration costs
- High quality development via process automation
- Uninterrupted progress “around the clock”

Follow a proven approach for mass migration to AWS

In today’s disruptive market, agility, speed of innovation, and time to market have surpassed cost savings as the key drivers of cloud adoption. More than ever, it’s critical to focus IT on what differentiates your business by retiring technical debt and leveraging the benefits provided by Amazon Web Services (AWS).

Based on best practices from dozens of successful migration engagements, Hewlett Packard Enterprise brings together technologies, implementation services, and methodologies to securely accelerate cloud adoption via the AWS Migration Acceleration Program (MAP).

Accelerating cloud adoption to achieve business objectives

Partnering with HPE offers many benefits:

- AWS MAP launch partner
- Experts in end-to-end cloud adoption and mission-critical cloud app development
- Ability to invest in customer success
- IP-based approach delivering superior time to value
- Automated AWS Landing Zone deployment with cloud kick start offering
- Migration factory execution through a global Migration Operation Center (MOC)
- Close technical and operational alignment with AWS Professional Services
- Increased engagement flexibility via subcontract with AWS

Global migration capabilities

- Increased flexibility
- Ability to invest
- IP-based approach
- Thousands of enterprise clients
- MAP launch partner
- Global MOC

Client success story

Natixis

Natixis Global Asset Management moves to AWS.
