HPE and VM2020

HPE SimpliVity, HPE Nimble Storage and VM2020 Solutions CyberVR™

Working together. Accelerating results.

A new style of partnering

Hewlett Packard Enterprise and VM2020 are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, VM2020 is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

VM2020 has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

Product overviews

VM2020 Solutions CyberVR™
CyberVR™ is a patent-pending simulation platform that transforms a disaster recovery site into a virtual cyber range.

By combining advanced automation with HPE SimpliVity software-defined infrastructure and seamless integration into HPE Nimble Storage snapshot replication and volume QoS capabilities, CyberVR™ improves cyber resilience and data protection while reducing costs and increasing system agility.

CyberVR™ delivers simulation and sandboxing capabilities by manipulating near-exact copies of production systems at no risk to production workloads. Users experiment with various courses of action before, during, and after simulated incidents to improve response readiness. CyberVR™ can help users:

- Hunt for threats without impacting production.

- Exploit vulnerabilities to describe cyber risks in a business context.

- Assess risks of remediation steps and patches on business processes.

- Conduct cyber wargames using near-exact copies of production systems.

- Accelerate triage and threat containment.

- Exercise full-scale recovery without additional IT resources.

- Practice forensic techniques that satisfy insurance companies.

- Align business continuity and cyber resilience teams.

HPE SimpliVity 380 and 2600

The HPE SimpliVity solutions give IT leaders the agility and economics of the cloud with the control and governance of on-premises IT. They deliver powerhouse hyperconverged solutions capable of running some of the world's most efficient and resilient data centers. These solutions dramatically simplify IT by combining infrastructure and advanced data services for virtualized workloads onto the bestselling server platforms in the market.

HPE SimpliVity 380, available on HPE ProLiant DL380 Servers, is a compact, scalable 2U rack-mounted building block that delivers server, storage, and storage networking services.

HPE SimpliVity 2600, available on HPE Apollo 2000 servers, is a compact solution optimized for edge and ROBO environments.

HPE Nimble Storage All Flash Arrays are simple to deploy, use, and manage. They are cloud-ready and deploy flash on-premises or in the cloud with common data services and mobility between all-flash, adaptive flash, and HPE Cloud Volumes. They are scale-to-fit; scale up performance and capacity independently and non-disruptively; and scale out to four arrays managed as one for increased flexibility.

HPE Nimble Storage leverages **flash storage and predictive analytics** to eliminate the gap and guarantee 99.9999% availability[1], delivering the best all-flash capacity per TB in the industry—and future-proofing design for value today and tomorrow.

Company overview

About VM2020 Solutions

VM2020 is an industry leader in easy-to-deploy IT automation solutions designed to develop and demonstrate an organization's ability to respond to business continuity and cyber risks. Its solutions for advanced cyber resilience combine patent-pending simulation systems with strategic technology alliances to deliver realistic cyber incident response drills.

VM2020's mission is to empower multi-disciplinary teams to deliver effective cyber defense and resilience capabilities across their enterprises. Its CyberVR™ and EZDR™ products provide decision-makers across industries such as finance, healthcare, defense, and law with evidence that risk management practices are operational and that their teams are focusing on the right cybersecurity issues.
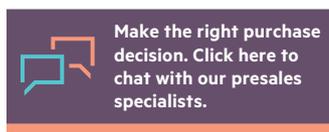

VM2020 Solutions is a member of the HPE Partner Ready for Technology Partner program and a recipient of the 2018 "HPE Momentum Technology Partner of the Year" Award. In 2017, CIO Magazine recognized VM2020 Solutions as one of its "20 Most Promising Disaster Recovery Solutions Providers".

About Hewlett Packard Enterprise

Hewlett Packard Enterprise is an industry-leading technology company that enables customers to go further, faster. With the industry's most comprehensive portfolio, spanning the cloud to the data center to workplace applications, our technology and services help customers around the world make IT more efficient, more productive, and more secure.
