

Overview

HPE FlexFabric 5900 Switch Series

The HPE FlexFabric 5900 Switch Series is a family of high-density, ultra-low-latency, top-of-rack (ToR) switches that is part of the Hewlett Packard Enterprise (HPE) FlexNetwork architecture's HPE FlexFabric solution.

Ideally suited for deployment at the server access layer of large enterprise data centers, the HPE FlexFabric 5900 Switch Series is also powerful enough for deployment at the data center core layer of medium-sized enterprises. With the increase in virtualized applications and server-to-server traffic, customers now require ToR switch innovations that will meet their needs for higher-performance server connectivity, convergence of Ethernet and storage traffic, the capability to handle virtual environments, and ultra-low-latency all in a single device.

HPE FlexFabric 5900 Switch Series

Models

HPE FlexFabric 5900AF 48G 4XG 2QSFP+ Switch

JG510A

Key features

- Cut-through with ultra low latency and wire speed
- HPE Intelligent Resilient Fabric (IRF) for virtualization and two-tier architecture
- High 1/10GbE ToR port density with 40 GbE uplinks
- IPv6 support in ToR with full L2/L3 features
- Convergence ready with DCB, FCoE, and TRILL

Standard Features

Data center optimized

- **Flexible high port density**
the HPE FlexFabric 5900 Switch Series enables scaling of the server edge with 1 GbE and 10GbE ToR deployments to new heights with high-density 48-port solutions delivered in a 1RU design; the high server port density is backed by 40 GbE QSFP+ uplinks to deliver the availability of needed bandwidth for demanding applications; each 40 GbE QSFP+ port can also be configured as four 10GbE ports by using a 40-GbE-to-10GbE splitter cable
- **High-performance switching**
cut-through and nonblocking architecture delivers low latency (~1 microsecond for 10GbE) for very demanding enterprise applications; the switch delivers high-performance switching capacity and wire-speed packet forwarding
- **Higher scalability**
Hewlett Packard Enterprise (HPE) Intelligent Resilient Fabric (IRF) technology simplifies the architecture of server access networks; up to nine HPE FlexFabric 5900 switches can be combined to deliver unmatched scalability of virtualized access layer switches and flatter two-tier networks using IRF, which reduces cost and complexity
- **Advanced modular operating system**
Comware v7 software's modular design and multiple processes bring native high stability, independent process monitoring, and restart; the OS also allows individual software modules to be upgraded for higher availability and supports enhanced serviceability functions like hitless software upgrades with single-chassis ISSU
- **SPB, TRILL, and EVB/VEPA**
Shortest Path Bridging (SPB) and Transparent Interconnection of Lots of Links (TRILL) is supported to increase the scale of enterprise data centers; Edge Virtual Bridging with Virtual Ethernet Port Aggregator (EVB/VEPA) provides connectivity into the virtual environment for a data center-ready environment
- **Reversible airflow**
enhanced for data center hot-cold aisle deployment with reversible airflow—for either front-to-back or back-to-front airflow
- **Redundant fans and power supplies**
1+1 internal redundant and hot-pluggable power supplies and dual fan trays enhance reliability and availability
- **Lower OPEX and greener data center**
provide reversible airflow and advanced chassis power management
- **Data Center Bridging (DCB) protocols**
provides support for IEEE 802.1Qbb Priority Flow Control (PFC), Data Center Bridging Exchange (DCBX), and IEEE 802.1Qaz Enhanced Transmission Selection (ETS) for converged applications
- **FCoE support**
provides support for Fibre Channel over Ethernet (FCoE), including expansion, fabric, trunk VF and N ports, and aggregation of E-port and N-port virtualization; fabric services such as name server, registered state change notification, and login services; per-VSAN fabric services, FSPF, soft and hard zoning, Fibre Channel traceroute, ping, debugging, and FIP snooping
- **Jumbo frames**
with frame sizes of up to 10,000 bytes on Gigabit Ethernet and 10-Gigabit ports, allows high-performance remote backup and disaster-recovery services to be enabled

Additional information

- **Green IT and power**
improves energy efficiency through the use of the latest advances in silicon development; shuts off unused ports and utilizes variable-speed fans, reducing energy costs
- **Low power consumption**
is rated to have one of the lowest power usages in the industry by Miercom independent tests

Convergence

- **LLDP-MED (Media Endpoint Discovery)**
is a standard extension of LLDP that stores values for parameters such as QoS and VLAN to automatically configure network devices such as IP phones
-

Standard Features

Quality of Service (QoS)

Powerful QoS features

- **Flexible classification**
creates traffic classes based on access control lists (ACLs), IEEE 802.1p precedence, IP, and DSCP or Type of Service (ToS) precedence; supports filter, redirect, mirror, remark, and logging
 - **Feature support**
provides support for Strict Priority Queuing (SP), Weighted Fair Queuing (WFQ), Weighted Deficit Round Robin (WDRR), SP+WDRR together, configurable buffers, Explicit Congestion Notification (ECN), and Weighted Random Early Detection (WRED)
-

Layer 2 switching

- **MAC-based, Protocol-based, and Subnet-based VLANs**
provides granular control and security; uses RADIUS to map a MAC address/user to specific VLANs, map protocols to specific VLANs or subnets to specific VLANs.
 - **Address Resolution Protocol (ARP)**
supports static, dynamic, and reverse ARP and ARP proxy
 - **Flow Control**
IEEE 802.3x Flow Control provides intelligent congestion management via PAUSE frames
 - **Ethernet Link Aggregation**
provides IEEE 802.3ad Link Aggregation of up to 128 groups of 16 ports; support for LACP, LACP Local Forwarding First, and LACP Short-time provides a fast, resilient environment that is ideal for the data center
 - **Spanning Tree Protocol (STP)**
STP (IEEE 802.1D), Rapid STP (RSTP, IEEE 802.1w), and Multiple STP (MSTP, IEEE 802.1s)
 - **VLAN support**
provides support for 4,096 VLANs based on port, MAC address, IPv4 subnet, protocol, and guest VLAN; supports VLAN mapping
 - **IGMP support**
provides support for IGMP Snooping, Fast-Leave, and Group-Policy; IPv6 IGMP Snooping provides Layer 2 optimization of multicast traffic
 - **DHCP support at Layer 2**
provides full DHCP Snooping support for DHCP Snooping Option 82, DHCP Relay Option 82, DHCP Snooping Trust, and DHCP Snooping Item Backup
-

Layer 3 services

- **Address Resolution Protocol (ARP)**
determines the MAC address of another IP host in the same subnet; supports static ARPs; gratuitous ARP allows detection of duplicate IP addresses; proxy ARP allows normal ARP operation between subnets or when subnets are separated by a Layer 2 network
 - **Dynamic Host Configuration Protocol (DHCP)**
simplifies the management of large IP networks and supports client and server; DHCP Relay enables DHCP operation across subnets
 - **Operations, administration and maintenance (OAM) support**
provides support for Connectivity Fault Management (IEEE 802.1AG) and Ethernet in the First Mile (IEEE 802.3AH); provides additional monitoring that can be used for fast fault detection and recovery
-

Standard Features

Layer 3 routing

- **Virtual Router Redundancy Protocol (VRRP) and VRRP Extended**
allow quick failover of router ports
 - **Policy-based routing**
makes routing decisions based on policies set by the network administrator
 - **Equal-Cost Multipath (ECMP)**
enables multiple equal-cost links in a routing environment to increase link redundancy and scale bandwidth
 - **Layer 3 IPv4 routing**
provides routing of IPv4 at media speed; supports static routes, RIP and RIPv2, OSPF, BGP, and IS-IS
 - **Open shortest path first (OSPF)**
delivers faster convergence; uses this link-state routing Interior Gateway Protocol (IGP), which supports ECMP, NSSA, and MD5 authentication for increased security and graceful restart for faster failure recovery
 - **Border Gateway Protocol 4 (BGP-4)**
delivers an implementation of the Exterior Gateway Protocol (EGP) utilizing path vectors; uses TCP for enhanced reliability for the route discovery process; reduces bandwidth consumption by advertising only incremental updates; supports extensive policies for increased flexibility; scales to very large networks
 - **Intermediate system to intermediate system (IS-IS)**
uses a path vector Interior Gateway Protocol (IGP), which is defined by the ISO organization for IS-IS routing and extended by IETF RFC 1195 to operate in both TCP/IP and the OSI reference model (Integrated IS-IS)
 - **Static IPv6 routing**
provides simple manually configured IPv6 routing
 - **Dual IP stack**
maintains separate stacks for IPv4 and IPv6 to ease the transition from an IPv4-only network to an IPv6-only network design
 - **Routing Information Protocol next generation (RIPng)**
extends RIPv2 to support IPv6 addressing
 - **OSPFv3**
provides OSPF support for IPv6
 - **BGP+**
extends BGP-4 to support Multiprotocol BGP (MBGP), including support for IPv6 addressing
 - **IS-IS for IPv6**
extends IS-IS to support IPv6 addressing
 - **IPv6 tunneling**
allows IPv6 packets to traverse IPv4-only networks by encapsulating the IPv6 packet into a standard IPv4 packet; supports manually configured, 6to4, and Intra-Site Automatic Tunnel Addressing Protocol (ISATAP) tunnels; is an important element for the transition from IPv4 to IPv6
 - **Policy routing**
allows custom filters for increased performance and security; supports ACLs, IP prefix, AS paths, community lists, and aggregate policies
 - **Bidirectional Forwarding Detection (BFD)**
enables link connectivity monitoring and reduces network convergence time for RIP, OSPF, BGP, IS-IS, VRRP, MPLS, and IRF
 - **Multicast Routing**
provides robust support of multicast protocols PIM-SM, PIM-DM, PIM-SSM and PIM-BIDIR
 - **Layer 3 IPv6 routing**
provides routing of IPv6 at media speed; supports static routing, RIPng, OSPFv3, BGP4+ for IPv6, and IS-ISv6
-

Standard Features

Management

- **USB support**
 - **File copy-** allows users to copy switch files to and from a USB flash drive
- **Multiple configuration files**
can be stored to the flash image
- **SNMPv1, v2c, and v3**
facilitate centralized discovery, monitoring, and secure management of networking devices
- **Network Time Protocol (NTP)**
synchronizes timekeeping among distributed time servers and clients; keeps timekeeping consistent among all clock-dependent devices within the network so that the devices can provide diverse applications based on the consistent time
- **Out-of-band interface**
isolates management traffic from user data plane traffic for complete isolation and total reachability, no matter what happens in the data plane
- **Port mirroring**
enables traffic on a port to be simultaneously sent to a network analyzer for monitoring
- **Remote configuration and management**
is available through a command-line interface (CLI)
- **IEEE 802.1AB Link Layer Discovery Protocol (LLDP)**
advertises and receives management information from adjacent devices on a network, facilitating easy mapping by network management applications
- **sFlow (RFC 3176)**
provides scalable ASIC-based wirespeed network monitoring and accounting with no impact on network performance; this allows network operators to gather a variety of sophisticated network statistics and information for capacity planning and real-time network monitoring purposes
- **Command authorization**
leverages RADIUS to link a custom list of CLI commands to an individual network administrator's login; an audit trail documents activity
- **Dual flash images**
provide independent primary and secondary operating system files for backup while upgrading
- **Command-line interface (CLI)**
provides a secure, easy-to-use CLI for configuring the module via SSH or a switch console; provides direct real-time session visibility
- **Logging**
provides local and remote logging of events via SNMP (v2c and v3) and syslog; provides log throttling and log filtering to reduce the number of log events generated
- **Management interface control**
provides management access through a modem port and terminal interface, as well as in-band and out-of-band Ethernet ports; provides access through terminal interface, Telnet, or secure shell (SSH)
- **Industry-standard CLI with a hierarchical structure**
reduces training time and expenses, and increases productivity in multivendor installations
- **Management security**
restricts access to critical configuration commands; offers multiple privilege levels with password protection; ACLs provide Telnet and SNMP access; local and remote syslog capabilities allow logging of all access
- **Information center**
provides a central repository for system and network information; aggregates all logs, traps, and debugging information generated by the system and maintains them in order of severity; outputs the network information to multiple channels based on user-defined rules
- **Network management**
HPE Intelligent Management Center (IMC) centrally configures, updates, monitors, and troubleshoots
- **Remote intelligent mirroring**
mirrors ingress/egress ACL-selected traffic from a switch port or VLAN to a local or remote switch port anywhere on the network

Standard Features

Manageability

- **Full-featured console**
provides complete control of the switch with a familiar CLI
- **Troubleshooting**
 - **Ingress and egress port monitoring:** enable network problem solving
 - **Traceroute and ping:** enable testing of network connectivity
- **Multiple configuration files**
allow multiple configuration files to be stored to a flash image
- **sFlow (RFC 3176)**
provides wire-speed traffic accounting and monitoring
- **SNMP v1, v2c and v3**
facilitate centralized discovery, monitoring, and secure management of networking devices
- **Out-of-band interface**
isolates management traffic from user data plane traffic for complete isolation and total reachability, no matter what happens in the data plane
- **Remote configuration and management**
is available through a secure command-line interface (CLI) over Telnet and SSH; Role-Based Access Control (RBAC) provides multiple levels of access; Configuration Rollback and multiple configurations on the flash provide ease of operation; remote visibility is provided with sFlow and SNMP v1/v2/v3, and is fully supported in HPE Intelligent Management Center (IMC)
- **ISSU and hot patching**
provides hitless software upgrades with single-unit In Services Software Upgrade (ISSU) and hitless patching of the modular operating system
- **Autoconfiguration**
provides automatic configuration via DHCP autoconfiguration, NETCONF and Python Scripting
- **Network Time Protocol (NTP), Secure Network Time Protocol (SNTP) and Precision Time Protocol (PTP)**
synchronize timekeeping among distributed time servers and clients; keep consistent timekeeping among all clock-dependent devices within the network so that the devices can provide diverse applications based on the consistent time. Precision Time Protocol (PTP) IEEE 1588v2 Compliant

Security

- **Access control lists (ACLs)**
provide IP Layer 3 filtering based on source/destination IP address/subnet and source/destination TCP/UDP port number
- **RADIUS/TACACS+**
eases switch management security administration by using a password authentication server
- **Secure shell**
encrypts all transmitted data for secure remote CLI access over IP networks
- **IEEE 802.1X and RADIUS network logins**
control port-based access for authentication and accountability
- **Port security**
allows access only to specified MAC addresses, which can be learned or specified by the administrator

Warranty and support

- **1-year warranty**
see <http://www.hpe.com/networking/warrantysummary> for warranty and support information included with your product purchase.
- **Software releases**
to find software for your product, refer to <http://www.hpe.com/networking/support>; for details on the software releases available with your product purchase, refer to <http://www.hpe.com/networking/warrantysummary>

Standard Features

Resiliency and high availability

- **HPE Intelligent Resilient Fabric (IRF) technology**
enables an HPE FlexFabric to deliver resilient, scalable, and secured data center networks for physical and virtualized environments; groups up to nine HPE FlexFabric 5900 switches in an IRF configuration, allowing them to be configured and managed as a single switch with a single IP address; simplifies ToR deployment and management, reducing data center deployment and operating expenses
 - **IEEE 802.1w Rapid Convergence Spanning Tree Protocol**
increases network uptime through faster recovery from failed links
 - **IEEE 802.1s Multiple Spanning Tree**
provides high link availability in multiple VLAN environments by allowing multiple spanning trees
 - **Per VLAN Spanning Tree (PVST)**
provides high link availability in multiple VLAN environments by allowing spanning tree instances per VLAN
 - **Virtual Router Redundancy Protocol (VRRP)**
allows groups of two routers to dynamically back each other up to create highly available routed environments
 - **Hitless patch upgrades**
allows patches and new service features to be installed without restarting the equipment, increasing network uptime and facilitating maintenance
 - **Ultrafast protocol convergence (< 50 ms) with standard-based failure detection—Bidirectional Forwarding Detection (BFD)**
enables link connectivity monitoring and reduces network convergence time for RIP, OSPF, BGP, IS-IS, VRRP, MPLS, and IRF
 - **Device Link Detection Protocol (DLDP)**
monitors link connectivity and shuts down ports at both ends if unidirectional traffic is detected, preventing loops in STP-based networks
 - **Graceful restart**
allows routers to indicate to others their capability to maintain a routing table during a temporary shutdown and significantly reduces convergence times upon recovery; supports OSPF, BGP, and IS-IS
-

1, 3, 5	HPE A58x0AF Back (Power Side) to Front (Port Side) Airflow 300W DC Power Supply	JG901A
1, 3	HPE FlexFabric Switch 650W 48V Hot Plug NEBS-compliant DC Power Supply	JH336A

Configuration Rules

- If 2 power supplies are selected they must be the same SKU number.
 - Localization (Wall Power Cord) required on orders without #B2B, #B2C (PDU Power Cord) . (See Localization Menu)

Notes: When Switches/Routers are Factory Racked, Then #B2B, or #B2C should be the Defaulted Power Cable option on the Switches/Routers.
 - Only supported on JG510A.
 - Localization (Wall Power Cord) required on orders without #B2B, #B2C (PDU Power Cord) or #B2E. (See Localization Menu) REMARK: When Switches/Routers are Factory Racked, Then #B2B, #B2C should be the Defaulted Power Cable option on the Switches/Routers.
 - Watson Only - Add "(NEBS)" after the description on the PS table
- Notes:**
- Drop down under power supply should offer the following options and results:
 - Switch/Router/Power Supply to PDU Power Cord - #B2B in North America, Mexico, Taiwan, and Japan or #B2C ROW. (Watson Default B2B or B2C for Rack Level CTO)
 - Switch/Router/Power Supply to Wall Power Cord - Localized Option (Watson Default for BTO and Box Level CTO)
 - High Volt Power Electrical Module to Wall Power Cord - #B2E Option. (Offered only in North America, Mexico, Taiwan, and Japan)
- Notes:** * Switch JG510A should default selection of Power Supply as JC680A but allow selection of JG900A and JG901A

Switch Options

Fan Trays

(JG510A) System (std 0 // max 2) User Selection (min 2 // max 2) per switch

(JG848A and JG849A) System (std 2 // max 2) User Selection (min 0 // max 0) per switch

Rule#	Description	SKU
1, 2	HPE 58x0AF Back (Power Side) to Front (Port Side) Airflow Fan Tray	JC682A
1, 2	HPE 58x0AF Front (Port Side) to Back (Power Side) Airflow Fan Tray	JC683A
1, 2	HPE X711 Front (Port Side) to Back (Power Side) Airflow High Volume Fan Tray	JG552A
1, 2	HPE X712 Back (Power Side) to Front (Port Side) Airflow High Volume Fan Tray	JG553A

Configuration Rules

- 1 Fan Trays cannot be mixed in the same switch enclosure
- 2 Only supported on JG510A.

Notes:

Watson Blue Text:

If there is any empty space below the switch in a rack when using Back to Front Fan Trays, JC682A, the rack will receive an Air Plenum kit that takes up 1U of additional space in the rack. The Air Plenum kit is not required on fully configured racks. This only applies for CTO Rack Level Integration. The Air Plenum Kit is a non-saleable SKU, and is brought in automatically for CTO Factory Rack Level Integration.

Details

Details are not available for all accessories. The following specifications were available at the time of publication.

HPE X120 1G SFP LC SX Transceiver (JD118B)

A small form-factor pluggable (SFP) Gigabit SX transceiver that provides a full-duplex Gigabit solution up to 550m on a Multimode fiber.

Ports	1 LC 1000BASE-SX port	
Connectivity	Connector type	LC
	Wavelength	850 nm
Physical characteristics	Dimensions	2.17(d) x 0.6(w) x 0.46(h) in. (5.51 x 1.52 x 1.17 cm)
	Full configuration weight	0.04 lb. (0.02 kg)
Electrical characteristics	Power consumption typical	0.8 W
	Power consumption maximum	1.0 W
Cabling	Maximum distance:	FDDI Grade distance = 220m OM1 = 275m OM2 = 500m OM3 = Not Specified by standard
	Cable length	up to 550m
	Fiber type	Multi Mode

HPE X120 1G SFP LC LX Transceiver (JD119B)

A small form-factor pluggable (SFP)

Ports	1 SFP 1000BASE-LX port (IEEE 802.3z Type 1000BASE-LX)	
Connectivity	Connector type	LC
	Wavelength	1300 nm
Physical characteristics	Dimensions	2.17(d) x 0.6(w) x 0.46(h) in. (5.51 x 1.52 x 1.17 cm)
	Full configuration weight	0.04 lb. (0.02 kg)
Electrical characteristics	Power consumption typical	0.8 W
	Power consumption maximum	1.0 W
Cabling	Maximum distance:	550m for Multimode and 10km for Singlemode
	Cable type	Either single mode or multimode;
	Fiber type	Both

HPE X120 1G SFP RJ45 T Transceiver (JD089B)

A small form factor pluggable (SFP) Gigabit 1000Base-T transceiver that provides a full duplex Gigabit solution up to 100m on a Cat-5+ cable.

Ports	1 RJ-45 1000BASE-T port (IEEE 802.3ab Type 1000BASE-T)	
Connectivity	Connector type	RJ-45
Physical characteristics	Dimensions	2.71(d) x 0.54(w) x 0.55(h) in. (6.88 x 1.37 x 1.4 cm)
	Full configuration weight	0.07 lb. (0.03 kg)
Electrical characteristics	Power consumption typical	0.8 W
	Power consumption maximum	1.0 W
Cabling	Maximum distance:	100m
	Cable type	1000BASE-T: Category 5 (5E or better recommended), 100 ÷ differential 4-pair unshielded twisted pair (UTP) or shielded twisted pair (STP) balanced, complying with IEEE 802.3ab 1000BASE-T

Services

Refer to the Hewlett Packard Enterprise sales website at: <http://www.hpe.com/networking/services> for details on the service-level descriptions and product numbers. For details about services and response times in your area, please contact your local Hewlett Packard Enterprise sales office.

Technical Specifications

HPE FlexFabric 5900AF 48G 4XG 2QSFP+ Switch (JG510A)		
I/O ports and slots	48 autosensing 10/100/1000 ports (IEEE 802.3 Type 10BASE-T, IEEE 802.3u Type 100BASE-TX, IEEE 802.3ab Type 1000BASE-T) Duplex: 10BASE-T/100BASE-TX: half or full; 1000BASE-T: full only 4 fixed 1000/10000 SFP+ ports 2 QSFP+ 40-GbE ports	
Additional ports and slots	1 RJ-45 serial console port 1 RJ-45 out-of-band management port 1 USB 2.0	
Power supplies	2 power supply slots 1 minimum power supply required (ordered separately)	
Fan tray	2 fan tray slots The customer must order fan trays, as fan trays are not included with the switch. This system requires two same-direction airflow fan trays to function properly. The system should not be operated with only one fan tray for more than 24 hours. The system should not be operated without a fan tray for more than two minutes. The system should not be operated outside of the temperature range of 32°F (0°C) to 113°F (45°C). Failure to comply with these operating requirements may void the product warranty.	
Physical characteristics	Dimensions	17.32(w) x 18.11(d) x 1.72(h) in (43.99 x 46.0 x 4.37 cm) (1U height)
	Weight	28.66 lb (13 kg) shipping weight
Memory and processor	512 MB flash; Packet buffer size: 9 MB, 2 GB SDRAM	
Performance	10 Gbps Latency	< 1.5 μ s (64-byte packets)
	Throughput	up to 250 Mpps (64-byte packets)
	Routing/Switching capacity	336 Gbps
	Routing table size	16000 entries (IPv4), 8000 entries (IPv6)
	MAC address table size	128000 entries
Environment	Operating temperature	32°F to 113°F (0°C to 45°C)
	Operating relative humidity	10% to 90%, noncondensing
	Acoustic	Low-speed fan: 65.7 dB, High-speed fan: 70.6 dB
Electrical characteristics	Frequency	50/60 Hz
	Maximum heat dissipation	887 BTU/hr (935.79 kJ/hr)
	Voltage	100 - 240 VAC, rated -40 to -60 VDC, rated (depending on power supply chosen)
	Maximum power rating	260 W
	Idle power	200 W
	Notes	Idle power is the actual power consumption of the device with no ports connected. Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated.

Management	IMC - Intelligent Management Center; command-line interface; out-of-band management; SNMP Manager; Telnet; FTP	
Notes:	The customer must order a power supply, as the device does not come with one. At least one JC680A or JC681A is required.	
Services	Refer to the Hewlett Packard Enterprise sales website at: http://www.hpe.com/networking/services for details on the service-level descriptions and product numbers. For details about services and response times in your area, please contact your local Hewlett Packard Enterprise sales office.	

Standards and protocols

Applies to all products in series

BGP

- RFC 1163 Border Gateway Protocol (BGP)
- RFC 1771 BGPv4
- RFC 1997 BGP Communities Attribute
- RFC 2918 Route Refresh Capability
- RFC 3392 Capabilities Advertisement with BGP-4
- RFC 4271 A Border Gateway Protocol 4 (BGP-4)
- RFC 4360 BGP Extended Communities Attribute
- RFC 4456 BGP Route Reflection: An Alternative to Full Mesh Internal BGP (IBGP)
- RFC 4760 Multiprotocol Extensions for BGP-4

Device management

- RFC 1157 SNMPv1/v2c
- RFC 1305 NTPv3
- RFC 1591 DNS (client)
- RFC 1902 (SNMPv2)
- RFC 1908 (SNMP v1/2 Coexistence)
- RFC 2573 (SNMPv3 Applications)
- RFC 2576 (Coexistence between SNMP V1, V2, V3)
- Multiple Configuration Files
- Multiple Software Images
- SSHv1/SSHv2 Secure Shell
- TACACS/TACACS+

Technical Specifications

General protocols

- IEEE 802.1D MAC Bridges
- IEEE 802.1p Priority
- IEEE 802.1Q VLANs
- IEEE 802.1s Multiple Spanning Trees
- IEEE 802.1w Rapid Reconfiguration of Spanning Tree
- IEEE 802.3ad Link Aggregation Control Protocol (LACP)
- IEEE 802.3ae 10-Gigabit Ethernet
- IEEE 802.3ag Ethernet OAM
- IEEE 802.3ah Ethernet in First Mile over Point to Point Fiber - EFMF
- IEEE 802.3x Flow Control
- RFC 768 UDP
- RFC 783 TFTP Protocol (revision 2)
- RFC 791 IP
- RFC 792 ICMP
- RFC 793 TCP
- RFC 826 ARP
- RFC 854 TELNET
- RFC 856 TELNET
- RFC 868 Time Protocol
- RFC 896 Congestion Control in IP/TCP Internetworks
- RFC 950 Internet Standard Subnetting Procedure
- RFC 1027 Proxy ARP
- RFC 1058 RIPv1
- RFC 1091 Telnet Terminal-Type Option
- RFC 1141 Incremental updating of the Internet checksum
- RFC 1142 OSI IS-IS Intra-domain Routing Protocol
- RFC 1191 Path MTU discovery
- RFC 1213 Management Information Base for Network Management of TCP/IP-based internets
- RFC 1253 (OSPF v2)

- RFC 2597 DiffServ Assured Forwarding (AF)
- RFC 3247 Supplemental Information for the New Definition of the EF PHB (Expedited Forwarding Per-Hop Behavior)
- RFC 3260 New Terminology and Clarifications for DiffServ

Security

- Access Control Lists (ACLs)

SSHv2 Secure Shell

Summary of Changes

Date	Version History	Action	Description of Change
03-Aug-2020	Version 39	Changed	SKU description were updated. Obsolete SKUs were removed.
04-Feb-2019	Version 38	Changed	Removed Box Level CTO SSP Section and logic from menu and configurators
21-Sep-2018	Version 37	Changed	Recommended and Extended markings removed from the document. Features and benefits updated
06-Aug-2018	Version 36	Changed	Configuration section updated: Added 10G AOC Cable compatibility
07-May-2018	Version 35	Changed	Configuration section updated
06-Mar-2017	Version 34	Added	SKUs added: JL437A, JL438A, JL439A
11-Nov-2016	Version 33	Removed	Removed not supported transceivers: JD098B; JD099B
19-Aug-2016	Version 32	Changed	Configuration section updated (#AC3 option added)
01-Aug-2016	Version 31	Changed	SKUs added: JL287A, JL288A, JL289A, JL290A, JL291A, JL292A, JL250A, JL286A Overview and Technical Specifications updated.
06-Jun-2016	Version 30	Changed	Document name changed to HPE FlexFabric 5900 Switch Series. Product description updated.
15-Apr-2016	Version 29	Changed	SKUs descriptions updated on all the document.
16-Feb-2016	Version 28	Changed	SKU added: JL251A Overview, Technical Specifications and Accessories updated,
08-Jan-2016	Version 27	Changed	Warranty and support updated
12-Oct-2015	Version 26	Changed	Overview, Technical Specifications and Accessories updated,
12-Dec-2014	Version 25	Removed	Deleted SKU JG325A
01-Dec-2014	Version 24	Added	Accessories section added
		Changed	Changes made on the entire document
09-Jun-2014	Version 23	Changed	Overview section revised.
31-Mar-2014	Version 22	Changed	Transceivers were revised.
