HP DAT/DDS Storage Media

Overview

Introduction

DDS is historically the most reliable and durable technology ever introduced within the tape market. DDS is ideal for entry-level and small networks looking for higher capacities with lower cost of ownership. DDS is an affordable solution for unattended back ups. HP co-invented DDS technology and was the first company to expand its DDS offering into the 5th generation known as DAT-72. In addition to co-inventing the DDS technology, HP also co-invented DAT 72, DAT 160 and the latest generation of DAT-320. HP's DDS media portfolio is now the most robust within the industry offering DDS-1 90m thru DAT 320 with capacities of up to 320GB on a single cartridge.

What's New

HP DAT 160 and newest generation- DAT 320:

HP has extended an already popular and trusted format by doubling the transfer rate to 12 MB/sec and more than doubling the capacity to 320 GB to create the new DAT 320. There is also a new HP DAT 320 Cleaning Cartridge.

HP's DAT 72 Storage Media Kit:

HP's DAT72 Storage Media Kit provides customers an easy way to purchase a comprehensive portfolio off DAT 72 storage media products in one easy to buy bundled solution. Each kit contains fourteen HP DAT 72 Data Cartridges (C8010A), one HP DDS Cleaning Cartridge (C5709A), twenty colored labels, a fourteen slot protective carrying case that can be used to securely store or transport cartridges when not in use, a free copy of the easy to read guide "The Essentials of Successful Tape Backup", and a free copy of HP's Storage Works Data Protector Express 3.1 Evaluation Software (60 day free trial).

HP DAT/DDS Storage Media

Overview

Models	HP DDS-1 4GB 90m Data Cartridge	C5706A
	HP DDS-2 8GB 120m Data Cartridge	C5707A
	HP DDS-3 24GB 125m Data Cartridge	C5708A
	HP DDS-4 40GB 150m Data Cartridge	C5718A
	HP DAT 72 72GB 170m Data Cartridge	C8010A
	HP DAT 72 Storage Media Kit	C8012A
	HP DAT160 160GB Data Cartridge	C8011A
	HP DAT 320 320GB Data Cartridge	Q2032A
	HP DDS Cleaning Cartridge	C5709A
	HP DAT 160 Cleaning Cartridge	C8015A
	HP DAT 320 Cleaning Cartridge	Q2039A

NOTE: 50 Cleans when used in an HP drive.

Key Features & Benefits

- **Improved Capacity:** supports capacities up to 320 GB
- **Value-For-Money:** lowest cost of ownership
- **Reliable:** historically the most reliable and durable technology
- **Safe:** limited lifetime warranty

HP DAT/DDS Storage Media

Product Highlights

Proven Reliability

HP ensures the highest level of quality with media specifications that far exceed industry standards. HP has 20 custom-built testing chambers that are in use 24 hours per day, 365 days per year. No other media supplier carries out such exhaustive qualification of the drive and media as HP. This is because no media supplier conducts extensive drive based tests on a daily basis and moreover, supports hardware warranty initiatives in the field with a vested interest in reducing all media-induced hardware issues. Changes in external conditions, which can easily occur when media is moved from different locations, can have a huge impact on error rate performance. Increased error rates jeopardizes backup, and backup disruption jeopardizes business continuity. HP customers are many and varied; this is why HP specifies stringent durability and reliability metrics that the media must satisfy before it is good enough to bear the HP logo.

DAT/DDS Technology

DDS/DAT is considered the most reliable and durable format of all the tape technologies. DAT320, the latest generation, uses ME (Metal Evaporated) media that has an excellent reliability record. This is achieved through a number of design features, such as a DLC (Diamond Like Coating) layer over the magnetic layer and a lubricant that is applied on top of the DLC layer. These, and other features, enable DAT320 media to achieve excellent durability and a 30-year archival life.
