

Keep your business going at full speed

HPE Flex Solutions for My First Server

You're on the road to success. Don't let "computer problems" get in your way.

Where do you keep your data and files?

PCs, notebooks, and/or mobile devices: What if one of those devices crashes or goes missing?

In the cloud on free online office software: What if you lose Wi-Fi for the day? What if one of the free online services is breached?

Simple, reliable, affordable

HPE Flex Solutions are pre-engineered and tested to give you the power to achieve more of your goals, sooner than you ever thought possible.

Are you ready to go the distance?

Imagine you're embarking on a cross-country road trip. You've plotted out every gas station and roadside diner on your favorite map app, and put all your banking information in your online wallet. Things are going great. Until you lose your phone.

If everything that makes your business run—contracts, email, employee and customer files, etc.—lives on laptops or networked PCs, you're headed for this moment.

"Entrepreneurs rarely think about IT infrastructure when they're just trying to get off the ground," says Brian Beneda, Manager,

Partner Technical Enablement. "No one realizes using the office manager's laptop to share and store critical data is a problem—until it crashes. For little more than the cost of a laptop, you can have the peace of mind that your files are safe, secure, and available."

Avoid the roadblock

HPE Flex Solutions for My First Server with Microsoft® Windows Server® 2016 are built to keep your business going at full speed, with features such as file and program sharing, critical business data protection, and management of users and antivirus/antimalware centrally. So if "something" happens to "someone's" computer, you're ready to get moving again right away.

Solution brief

Four reasons to get a server

Enhance security through centralized management of users, and online data backup and virus protection

Increase productivity by easily sharing and organizing files

Enhance efficiency by making files, email, and collaboration tools accessible from any device

Save time and money by reducing hardware costs and simplifying IT management tasks

Smooth your journey

Of course, there's more to a server than just data protection. But we've got you covered, there, too.

HPE Flex Solutions for My First Server provides a cost-effective, secure platform for collaboration—including mobile workers—to boost productivity and efficiency. Intel®-powered HPE ProLiant servers give you more processing power in a robust, easy-to-manage solution that uses automated intelligence to reduce the time you spend on your server, allowing you to focus more time and energy on your business.

The portfolio offers a variety of flexible configurations so you can find one that aligns with your needs and budget.

These flexible, predefined configurations are delivered with HPE Partner support to simplify sizing and accelerate provisioning. And you can purchase only what you need today, and grow your solution seamlessly along with your business.

You also benefit from HPE Pointnext combined with HPE Get Connected, so your support experience is enhanced with proactive problem prevention and faster issue resolution, resulting in a significant reduction in downtime.

No need to detour

You've got a lot riding on your business data, so call your Hewlett Packard Enterprise or Authorized Partner sales rep to find out more about protecting it, today.
