HPE Accelerator Workshops for Cloud

Public Cloud is growing at a rapid pace within the enterprise, yet every enterprise's journey to the cloud is different. Some enterprises are very early in their journey trying to determine what workloads should move to cloud or stay on-premises. Others wonder how they will handle governance and compliance in the cloud. And, of course, all are interested in managing cloud costs. In short, everyone's needs and next-steps in their cloud journey are different so how do you get the proactive and specific help you need to move forward?

With HPE Accelerator Workshops for Cloud you get a workshop built around your specific needs and interests as well as a set of recommendations, based on our findings, for your next steps forward; a plan.

The HPE Accelerator Workshops for Cloud service provides clients the opportunity to choose from multiple workshops utilizing a common framework. Workshops can focus on strategic topics or technical topics. Strategic topics include; strategy & economics, application inventory and readiness, organizational development, and cloud operations. Technical topics can include deep dives on cloud security, DevOps, Big Data, IoT, or Digital Innovation. The selected topics are combined in the workshop to address your immediate needs and help you understand and make sense out of the next step forward.

This 1–3 day workshop addresses the Cloud topics specific to your interest. The workshops have been developed by combining the intellectual property from Cloud Technology Partners, a Hewlett Packard Enterprise company, and HPE Pointnext, through hundreds of successful cloud deployments. The workshop is specific to your cloud journey; whether the need is strategic, technical, or both, this workshop is assembled to meet your needs and goals.

The outcome of the HPE Accelerator Workshops for Cloud is a set of recommendations and steps to move forward in your cloud transformation. You can choose to move forward on your own or leverage our skills and experience. We offer a full portfolio of **cloud services**; assessments, architecture and design, implementation, migration, or managed services. You can leverage some or all of them in your cloud journey.
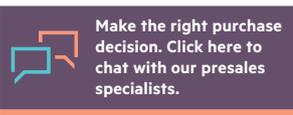

Example workshops

The workshop can take on many forms to address the varied needs of your cloud journey. Some examples are:

1. If you are an IT leader, a workshop can be designed to help you align with your peers around a shared understanding, vision, goals and objectives of a cloud transformation. It can serve as the rally cry for your transformation. It will quickly uncover blockers and put a timeframe around your cloud transformation.

2. As a development lead, a workshop can consist of topics to better understand DevOps in the enterprise, deep dive into the Software Development Lifecycle (SDLC), Security, and Continuous Integration/Continuous Deployment (CI/CD) process.

3. For enterprises in a particular industry, a workshop can focus on case studies and examples utilizing CTP's methodologies in delivering successful projects in that vertical; along with strategic and technical topics in which you have interest.
