

GOVERNMENT/PUBLIC SECTOR

## European nation transforms IT services

This national government's internal services organization provides IT and telecommunications for all of the country's federal agencies. Hitting the growth limits of its legacy infrastructure, the organization chose HPE to deliver an end-to-end private cloud solution delivering fast, agile, resilient, and reliable technology services. The results: more-efficient government and better public service—at less taxpayer expense.

GOVERNMENT/PUBLIC SECTOR

## Overview

# Multiple

Federal departments

# 1

Internal Service Provider

## Expected Outcomes

# Faster

And more effective digital services to Swiss citizens

# ≈25%

Expected cost reduction supports improved stewardship of government resources

# 99.999%

Availability supports projected improvements in quality of public digital services
