- Instructor-Led Training (ILT) in an HPE facility
- Private training at your chosen venue
- Business simulations

Purchase options

- Credit card or purchase order
- HPE Training Credits—Buy training credits up front and use them as needed
- HPE Support Contract Attach—Purchase training credits as part of your HPE Support Contract

How are you preparing your people to be successful as technology changes?

The pace of change today is faster, more challenging, and farther reaching than ever before. To stay competitive, organizations need to prepare their people to work effectively with digital technology.

IT teams need skills development and training, to work with modern **Hybrid Cloud** environments, edge computing, and data analytics. Servers, storage, and network technologies along with platform systems are critical for these teams to master. As IDC reports, effective training is delivered to teams in which between 45–55%² of the people must be trained and knowledgeable; this is the tipping point at which organizations see the benefits of training investments.

For general workforce professionals, as well, the stakes for technology training are higher. Workers must stay informed about technology advances to know how they and their teams are impacted, to understand how to apply technology benefits to customer service and other competitive efforts, as well as to plan for future business strategies and innovations.

With unprecedented levels of technology change and possibilities, what are you doing to prepare your workforce?

Management of Change consulting services

HPE understands the importance of the human element with any successful IT-enabled business change and can support you with Management of Change (MoC), a formalized approach to transitioning individuals, teams, and organizations to a desired future state. Our MoC practice is designed to assist companies to achieve the desired business results by proactively preparing and supporting people throughout technology change while also minimizing known causes of failed technology adoption. Our experts support the plans of many global clients and deliver predictable, effective benefits through MoC. These benefits include faster adoption of new technology, new processes, and new ways of working and ensuring that the people have the motivation, knowledge, and skills necessary to succeed.

Solution brief

Technical training courses

HPE is a market leader in technology training, as recognized by IDC for six years running.³ With over 35 years of experience, we lead the industry in modern skills-based IT training and digital on-demand learning. We offer a comprehensive range of delivery options, ranging from on-demand to instructor-led, all supported with virtual labs for hands-on learning. Our teams offer training across a broad range of HPE products, industry-leading technologies, and IT process disciplines (see Figure 1). HPE Digital Learner subscriptions offer the blended and holistic learning experiences that IT and business professionals need.

HPE Digital Learner subscriptions

HPE Digital Learner offers ongoing technology training and skills development, for teams of people at a better value to your business. We do this by putting effective technology training within reach of more people in your organization, at less cost per student and with less disruption to your business. Digital Learner provides a state-of-the-art learning platform with predefined learning paths, searchable and sharable content, virtual hands-on labs, social learning, metrics, and reporting—all available at point-of-need to your workforce.
