

Charles Clark

Fellow, Aruba
Hewlett Packard Enterprise

Charles Clark is Vice President and Fellow in Hewlett Packard Enterprise's Aruba Networking business unit, where he is responsible for research activities and leads a variety of projects focused on innovative hardware architectures and powerful new software technologies. Clark's current work focuses on flexible, programmable networking, network operations automation, and network device security.

Prior to joining HPE, Clark was a computer scientist at IBM. He received his Ph.D. in computer science from the University of Utah.
