

Protect your business

HPE Small Business Solutions for Unified Threat Management with ClearOS

Keep the business running

Protect the network from external attacks.

Improve productivity

Safeguard employee productivity by blocking time-wasting apps and services.

Your business is at risk

If you're working in a small business or home office, chances are good that you lock the doors at night to protect your physical assets. But how are you safeguarding your electronic assets—things like sensitive customer and business information? And what about intangible assets like employee productivity?

You may not even realize it, but your network is open to two types of vulnerabilities. First, it's under attack by cybercriminals attempting to trick your employees with phishing, ransomware, and other scams. In fact, hackers launch an attack every 39 seconds,¹ and 43% of attacks target small businesses.² Second, distracting content and services can flow over the network and into the business to distract employees from their work.

Secure the network to protect data and productivity

HPE Small Business Solutions for Unified Threat Management (UTM) make it easy for you to protect both your data and your employees' productivity with one simple, affordable, and secure solution.

Your solution starts with **HPE ProLiant servers**, powered by Intel® Xeon® processors and optimized and validated to run the ClearOS™ open source Linux® server operating system (OS). HPE Small Business Solutions for Unified Threat Management allow you to customize your server from a built-in ClearOS application marketplace to help you protect files and applications from network attacks, malware, viruses, and phishing scams. They also enable filtering and blocking of time-wasting apps, sites, and services so you and your team can be as productive as possible.

Better together

HPE ProLiant and ClearOS deliver:

- **Simplicity**—HPE SMB Offers are preconfigured HPE ProLiant servers optimized for the included ClearOS, making them easy to deploy.³ Ease of use provided by HPE ProLiant automation and the intuitive, web-based ClearOS user interface result in 6X faster deployment.⁴ And ClearOS integrates with existing IT, including Microsoft® Windows®.
- **Security**—ClearOS offers proven security apps and functions such as automatic updates, group policies, and Active Directory integration. ClearOS has already **delivered patches to overcome the Spectre and Meltdown issues**.
- **Affordability**—Low-cost HPE SMB Offers make hybrid cloud easy to consume.⁵ ClearOS is a cost-effective alternative to purchasing individual server, network, and gateway components.⁶ Plus, there are no upfront costs for the OS—pay just for the apps and ClearOS subscription services you need. Together, HPE ProLiant servers with ClearOS deliver up to 50% lower total cost of ownership.⁴ And HPE Subscription is a flexible option that packages hardware, software, accessories, and services into a predictable monthly payment.

- **Improve productivity** by filtering distracting content with apps like **Application Filter, Protocol Filter, Web Content Filtering System**, and more.

HPE Pointnext

HPE Pointnext has the expertise to help you simplify operations and easily extend your IT staff, helping them do more with less. Services from HPE Pointnext help you innovate to keep ahead of risks like competitive and security threats. A variety of offerings—from advising on best practices and project-based engagements, to operational support services—keeps your environment running efficiently and reliably.

Don't delay

Together, HPE ProLiant servers with ClearOS provide a low-cost, easy-to-use UTM solution. Contact your HPE or authorized reseller sales representative to find out more, today.
