

Reynolds Porter Chamberlain

RPC moves securely to the future with a flexible cloud solution

Objective

- Renew ageing environment with a new future-proofed solution

Approach

- Researched hyper converged infrastructure (HCI) systems from two leading vendors, basing decision on demonstrations and references that revealed technological maturity

Benefits

- Provides quicker performance at less cost
- Enables virtual machines to be created in minutes
- Delivered system set-up in under one hour
- Combines the security of locally held data with a forward-looking move into the cloud
- Increases business competitiveness and reduces expenditure
