

# Integration and Performance Services

## Deployment Services

You may be working to match the speed of your actions with your opportunities, but business speed is no longer just about doing the same things faster. It's about finding new and innovative ways to be faster across your entire business. This type of digital transformation can be daunting and you may be concerned about operational complexity, lack of internal capabilities, insufficient resources and the best options for integration into your existing environment.

To reduce these risks, experts at HPE Pointnext can help you navigate each step of your IT transformation journey. Our structured approach, based on standards and proven processes, can deliver optimal performance from the start to accelerate ROI.

Deployment Services from HPE Pointnext can help you to adopt new technologies faster, install and expand more easily, and transition without disruption or delay.

### **HPE Factory Express**

This provides hardware and software solutions, direct from the factory which are built, pre-configured, and tested to your specifications, delivered for rapid onsite installation.

### **Installation Services**

HPE provides onsite hardware and software installation and handover for IT solutions, including complex custom projects.

### We're with you every step of the way

Boost your IT performance today, modernize for the future, and maximize your return on investment over your entire IT lifecycle.

[See the brochure for details](#)

### Configuration Deployment Integration Services

For customers who have complex networking deployment needs, who need a single vendor to manage deployment across multiple countries, multiple locations or a wide range of products with tailored deployment needs, this end-to-end deployment service meets your specific requirements for complex projects that cannot be met by standard installation services. We build the statement of work in close collaboration with you. Once delivery commences, you will have access to a central portal to track deployment schedules, key performance metrics and the overall performance of the service.

### Project Management

Take advantage of an HPE project manager to coordinate and manage IT projects ranging from a simple relocation to a complex technical upgrade program across your IT environment.

### Technical Training

Accessing the right training for the right people is the key to success of a transformation. We can guide and support you throughout your journey to ensure productivity and readiness for operating in your new technology environment – through on-demand training and virtual labs to tailored instructor-led workshops and training sessions. Our Digital Learner annual subscription provides access to anytime training and delivers e-learning content curated for teams on an ongoing basis, with digital badge incentives and metrics collection for outcome analysis.

### Why choose Integration and Performance Services from HPE Pointnext?

**Benefit from innovation built on HPE Intellectual Property.** This lowers your risks and costs using proven best practices, automation and methodologies that have been tested and refined by HPE experts through 11,000 IT projects a year.

**Work with best-in-class ecosystem partners.** Accelerate your business with experienced, certified experts who can assist with a wide range of HPE and multivendor technology.

**Get help when, where, and how you need it.** Tap into a global delivery organization in more than 80 countries. Integration and Performance Services are available directly from HPE Pointnext or via our global channel partner network.

**Choose from customized, standard or turnkey solutions.** Get the ultimate in flexibility with standard deliverable packages for an off-the-shelf solution, or custom services tailored to meet your individual needs.
