

HPE Transformation Workshop: Adaptive Security and Protection

Advisory and Professional Services from HPE Pointnext

Service overview

Protecting your digital enterprise requires alignment with key IT and business decision-makers for a business-aligned, integrated, and proactive strategy to protect your hybrid cloud infrastructure and data-driven operations, as well as enable workplace productivity. By focusing on digital protection as a business enabler, the HPE Transformation Workshop: Adaptive Security and Protection is an excellent way to begin this process.

During this 1-day interactive workshop, Hewlett Packard Enterprise brings new perspectives on how your organization can transform from traditional static security and recovery practices to intelligent and adaptive models to keep pace with your business dynamics. We explore your models and frameworks, as well as steps that help take you from where you are today to reach your short- and long-term enterprise security and resiliency goals.

Service benefits

- Obtain a high-level road map for your adaptive security and protection transformation initiatives
- Define a unified vision for your digital enterprise and align your transformation initiative definition
- Identify strategic objectives and quick wins

Service feature highlights

- 1-day interactive workshop

Specifications

Table 1. Service features

Feature	Delivery specifications
1-day interactive workshop	<p>The HPE experts facilitate the workshop based on our knowledge and experience with new technology megatrends, risk and threat management, and protection models to help the customer align their business needs and priorities.
