

Keep data available

Imagine you're running a medical office. How do you make sure patient records are available when you need them—for care and compliance?

Maintain data high availability with software-defined storage

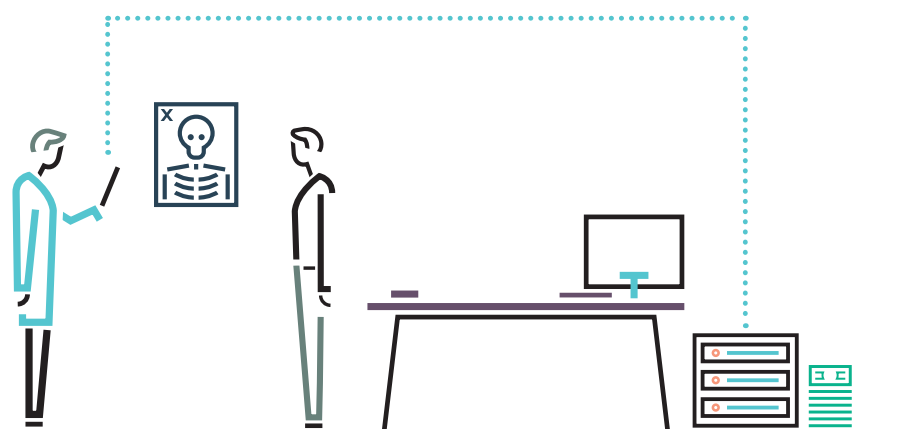

Traditional storage

Reliable storage with adequate capacity can be complex and expensive.

High-availability storage

Store more data, more securely and affordably, with software-defined storage built just for small and midsize businesses.

Choose Microsoft® Storage Spaces Direct or VMware® vSAN™.

Keep the business running

Recover data quickly after a hard drive failure.

Increase IT efficiency

Reduce costs and complexity compared to traditional storage.

HPE helps you avoid storage surprises
