

Eric Pelletier

Fellow, Aruba
Hewlett Packard Enterprise

Eric is a System Architect in the Aruba Networking business where he is responsible to conceive new hardware technologies and develop networking platforms. Eric was the system architect for the Aruba 8400 Core and Aggregation Switch and has contributed to a number of other Aruba platforms. Eric's interest areas include switch fabric architectures, circuit design, highly available architecture, queuing and traffic management architecture, green/sustainable design techniques, design integrity methodology and networking technologies. Eric holds several patents.

Prior to HPE, Eric held design leadership and management positions in a number of communication equipment and silicon startups. Eric earned his BS-EE from the University of Rochester.
