

Delivering high availability, assured compliance

Veeam and HPE simplify strong data protection for financial services

“The partnership between Veeam and HPE was strong and was reinforced by a lot of good material evidence. It was clear also that there had been a great deal of testing conducted in labs. All of these factors gave us extra confidence that this was the right direction to take.”

— John Sew Hoy, Director, Head of IT Security, First New Zealand Capital

Challenge

- Protect financial data to meet customer demand for 24/7 availability
- Comply with a wide range of industry and government regulatory requirements

Solution

- Integrate Veeam Backup & Replication software with HPE 3PAR and HPE Nimble tier-one storage, as well as HPE StoreOnce backup solutions.

Technology featured

- HPE 3PAR StoreServ Storage
- HPE Nimble Storage
- HPE StoreOnce Backup
- Veeam Backup and Replication

Outcome

- Reduces downtime by up to 94% with 5-minute RTO and 15-minute RPO
- Saves one bank nearly 200 hours per year in data recovery time
- Streamlines backup and recovery regardless of workload type or location
- Supports a 99.99% service continuity commitment to customers
- Enables demonstrable compliance with regulations
- Lowers total cost of ownership
