We look forward to your call!

Our complete HPE Education Services Training Program you can easily find on hpe.com/ww/DACHeducation

Individual Achievement

All courses we offer in our standard program can also be customized especially for your requirements.

We will meet your expectations regarding time, location and content of the project and create an individual concept for you to get to an optimal implementation. You can decide whether the training will be held in our training centers or in-house at your location, to gain more practical orientation and save your employees travel times and costs. And your employees are accessible if necessary at the spot.

If required HPE Education Services will provide hardware and software including peripherals to ensure a successful implementation of the training project.

Benefits

Your employees learn target-oriented all essential contents. This makes the learning success fast, economic and effective. With qualified employees you are always able to offer all necessary resources in order to ensure the Return on IT Investment of your company.

Quality

Customized Trainings from HPE Education Services considers your company structures – the training schedule will be especially aligned to your IT Infrastructure. An experienced and dedicated team will advise you – the HPE Education Services experts for customized learning. With our highly qualified trainers we will exceed your expectations – this is our goal.

Learn from the best of the class

With HPE you decide for a worldwide leader in Information Technology. First hand know-how coming directly from the manufacturer.

HPE Education Services implements this know-how into trainings with highest quality standards. We can advise you in detail, develop together with you the best solution for your company and realize your training from the initial planning up to performance review.

Minimize your efforts and maximize your Return on IT Investment
