

# Statement of Conformance to European Packaging Standards

This statement covers all official Hewlett Packard Enterprise branded packaging materials.

| Standard/Report                        | Assessment Requirements   | Claim | Note   |
|--|---|-------|--|
| 1.1 Prevention by source reduction     | Ensure only minimum adequate amount of material in the packaging system EN 13428:2004                 | X     | HPE Standard 011-2 General Specification for the Environment – Packaging Requirements & the Global Environmental Packaging Reference Guide |
| 1.2 Heavy Metals                       | Ensure below maximum permitted levels for components CR 13695-1:2000                                  | X     | HPE Standard 011-2 General Specification for the Environment – Packaging Requirements & the Global Environmental Packaging Reference Guide |
| 1.3 Other noxious/hazardous substances | Ensure conformance with EN 13428:2004 CEN/TR 13695-2:2004   | X     | HPE Standard 011-2 General Specification for the Environment – Packaging Requirements & the Global Environmental Packaging Reference Guide |
| 2 Reuse                                | Ensure reusability in all terms of the standard for the functional packaging unit per EN 13429:2004   |       | Global Environmental Packaging Reference Guide   |
| 3.1 Recovery by Material Recycling     | Ensure recyclability in all terms of the standard for the functional packaging unit per EN 13430:2004 | X     | Global Environmental Packaging Reference Guide   |

| Standard/Report                    | Assessment Requirements  | Claim | Note   |
|------------------------------------|--|-------|--|
| 3.2 Recovery in the form of energy | Ensure that calorific gain is achievable for the functional packaging unit per EN 13431:2004       | X     | Global Environmental Packaging Reference Guide |
| 3.3 Recovery by composting         | Ensure compostability in all terms of the standard for the functional packaging unit EN 13432:2000 |       | Global Environmental Packaging Reference Guide |

**NOTE:** Conformity with EN 13427:2004 requires affirmative response to sections 1.1, 1.2, 1.3 and to at least one of 3.1, 3.2, and 3.3. In addition, where a claim of reuse is made, section 2 must also record affirmative responses. Claim selection is made by the responsible product steward.

In light of the assessment results recorded above, this packaging is in conformance with the requirements of EN 13427:2004.

## **Terms and Definitions**

For the purpose of this document the terms and definitions contained in EN 13193:2004 together with the following apply:

**Supplier** – entity responsible for placing packaging or packed product on the market – the term “supplier” in normal usage can relate to various points in a supply chain. In this case it relates to any point on the supply chain where a transaction relating to packaging or packaged product takes place.

**Packaging component** – part of packaging that can be separated by hand or by using simple physical means

**Packaged Product Group Identification** – The product category, product group description or other means of defining the products covered by the individual statement of compliance

## **Consideration and selection of appropriate assessment procedures**

The signatory on the statement of conformance shall ensure that the applicability of the relevant standards listed on the statement of conformance has been assessed in relation to the packaging or packaged product placed on the market, taking into account their intended use. It is recommended that any supporting documentation associated with the declarations made on the statement of conformance that are above and beyond the recommended HPE Standards and Specifications be maintained in accordance with the applicable ISO 9000 series certification.

The signatory or his designee shall select a combination of standards/reports to be used for the packaged product group included on the statement of conformance. Conformance with EN 13427:2004 requires affirmative response to sections 1.1, 1.2, 1.3 and to at least one of 3.1, 3.2 and 3.3. In addition, where a claim of reuse is made, section 2 must also record affirmative responses.
