

# QuickSpecs

## HPE ProLiant WS460c Gen8 Graphics Server Blade

### Overview

### HPE ProLiant WS460c Gen8 Graphics Server Blade

**Figure 1 - HPE ProLiant WS460c Gen8 Graphics Server Blade (single-width type)**

- |  |  |
|--|--|
| 1. Two (2) PCIe 3.0 mezzanine I/O expansion slots          | 7. Up to two (2) Intel® Xeon® E5-2600 family processors          |
| 2. FlexibleLOM adapter                                     | 8. Internal USB 2.0 and Trusted Platform Module (TPM) connectors |
| 3. MicroSDHC card connector                                | 9. Two (2) small form factor (SFF) hot-plug drive bays           |
| 4. FlexibleLOM connectors (supporting one (1) FlexibleLOM) | 10. HPE c-Class Blade SUV (Serial, USB, VGA) connector           |
| 5. Sixteen (16) DDR3 DIMM memory slots (8 per processor)   | 11. HPE Smart Array P220i/P230i Controller with 512MB FBWC       |
| 6. HPE Smart Array P220i/P230i Controller connector        | 12. Access panel   |

## Overview

**Figure 2 - HPE ProLiant WS460c Gen8 Graphics Server Blade with graphics expansion (double-width type)**

|---|---|
| 1. HPE Graphics Expansion Blade                               | 4. HPE ProLiant WS460c Gen8 Graphics Server Blade base system |
| 2. Standard full length PCI Express Generation 2 (x16) slot 2 | 5. Small form factor (SFF) drive bays                         |
| 3. Standard full length PCI Express Generation 2 (x16) slot 1 | 6. Local I/O Connector (shown with cover removed)             |

## What's New

- Support for AMD FirePro S4000X MXM mezzanine graphics
- Support for HPE Fibre Channel HBA mezzanine cards
- Support for HPE FlexFabric 20Gb 2-port 630FLB adapter
- Support for HPE OneView Software License

## Standard Features

This document covers the HPE ProLiant WS460c Gen8 Graphics Server Blade and its specific options. For more information on HPE BladeSystem c-Class Enclosures and HPE BladeSystem c-Class Interconnect and Mezzanine Components, please see the following:

- HPE BladeSystem c-Class Enclosures QuickSpecs:
  - HPE BladeSystem c3000 Enclosure  
QuickSpecs: [http://h18000.www1.hp.com/products/QuickSpecs/12790\\_na/12790\\_na.html](http://h18000.www1.hp.com/products/QuickSpecs/12790_na/12790_na.html)  
**NOTE:** The c3000 HPE c-Class enclosures have full backwards and forwards compatibility, existing server blades are supported in the new enclosures and any future server blades will be supported in the existing enclosures.
  - HPE BladeSystem c7000 Enclosure QuickSpecs:  
[http://h18000.www1.hp.com/products/QuickSpecs/12810\\_na/12810\\_na.html](http://h18000.www1.hp.com/products/QuickSpecs/12810_na/12810_na.html)  
**NOTE:** The c7000 HPE c-Class enclosures have full backwards and forwards compatibility, existing server blades are supported in the new enclosures and any future server blades will be supported in the existing enclosures.  
**NOTE:** For optimal cooling and system performance the WS460c Gen8 requires the c7000 enclosure to be configured with 10 fans and the c3000 enclosure to be configured with 6 fans.
  - HPE BladeSystem c-Class Interconnect and Mezzanine Components:  
<http://h18004.www1.hp.com/products/ blades/ components/ c-class-interconnects.html>  
<http://h18004.www1.hp.com/products/ blades/ components/ c-class-adapters.html>

The HPE ProLiant WS460c Gen8 provides greater 2P x86 server blade density without compromise and maximum power-efficiency with flexibility and choice.

HPE ProLiant WS460c Gen8 Graphics Server Blade and optional HPE WS460c Gen8 graphics expansion blade includes:

**NOTE:** For the Standard Features shipped in the "Factory Integrated Models", please see the "Configuration Information - Factory Integrated Models" section.

### HPE Processor E5-2600 v2 series Processors

One of the following depending on Model

- Intel® Xeon® E5-2697 v2 (2.7GHz/12-core/30MB/8.0GT-s QPI/130W, DDR3-1866, HT, Turbo2-3/3/3/3/3/3/4/5/6/7/8)
- Intel® Xeon® E5-2695 v2 (2.4GHz/12-core/30MB/8.0GT-s QPI/115W, DDR3-1866, HT, Turbo2-4/4/4/4/4/4/4/4/5/6/7/8)
- Intel® Xeon® E5-2690 v2 (3.0GHz/10-core/25MB/8.0GT-s QPI/130W, DDR3-1866, HT, Turbo2-3/3/3/3/3/3/4/5/6)
- Intel® Xeon® E5-2680 v2 (2.8GHz/10-core/25MB/8.0GT-s QPI/115W, DDR3-1866, HT, Turbo2-3/3/3/3/3/4/5/6/7/8)
- Intel® Xeon® E5-2670 v2 (2.5GHz/10-core/25MB/8.0GT-s QPI/115W, DDR3-1866, HT, Turbo2-4/4/4/4/4/4/5/6/7/8)
- Intel® Xeon® E5-2660 v2 (2.2GHz/10-core/25MB/8.0GT-s QPI/95W, DDR3-1866, HT, Turbo2-4/4/4/4/4/4/5/6/7/8)
- Intel® Xeon® E5-2643 v2 (3.5GHz/6-core/25MB/8.0GT-s QPI/130W, DDR3-1866, HT, Turbo2- 1/1/1/1/2/3)
- Intel® Xeon® E5-2650L v2 (1.7GHz/10-core/25MB/8.0GT-s QPI/70W, DDR3-1600, HT, Turbo2-2/2/2/2/2/2/2/3/4)
- Intel® Xeon® E5-2667 v2 (3.3GHz/8-core/25MB/8.0GT-s QPI/130W, DDR3-1866, HT, Turbo2- 3/3/3/3/4/5/6/7)
- Intel® Xeon® E5-2643 v2 (3.5GHz/6-core/25MB/8.0GT-s QPI/130W, DDR3-1866, HT, Turbo2- 1/1/1/1/2/3)
- Intel® Xeon® E5-2637 v2 (3.5GHz/4-core/15MB/8.0GT-s QPI/130W, DDR3-1866, HT, Turbo2- 1/1/2/3)

## Standard Features

Intel® Xeon® E5-2640 v2 (2.0GHz/8-core/20MB/7.2GT-s QPI/95W, DDR3-1600, HT, Turbo2- 3/3/3/3/3/4/5)  
Intel® Xeon® E5-2630 v2 (2.6GHz/6-core/15MB/7.2GT-s QPI/80W, DDR3-1600, HT, Turbo2- 3/3/3/3/4/5)  
Intel® Xeon® E5-2630L v2 (2.4GHz/6-core/15MB/7.2GT-s QPI/60W, DDR3-1600, HT, Turbo2- 2/2/2/2/3/4)  
Intel® Xeon® E5-2620 v2 (2.1GHz/6-core/15MB/7.2GT-s QPI/80W, DDR3-1600, HT, Turbo2- 3/3/3/3/4/5)  
Intel® Xeon® E5-2609 v2 (2.5GHz/4-core/10MB/6.4GT-s QPI/80W)  
Intel® Xeon® E5-2603 v2 (1.8GHz/4-core/10MB/6.4GT-s QPI/80W)

### E5-2600 series Processors

Intel® Xeon® E5-2690 (2.9GHz/8-core/20MB/8.0GT-s QPI/135W, DDR3-1600, HT, Turbo2- 4/4/4/5/5/7/7/9)  
Intel® Xeon® E5-2680 (2.7GHz/8-core/20MB/8.0GT-s QPI/130W, DDR3-1600, HT, Turbo2- 4/4/5/5/5/7/8/8)  
Intel® Xeon® E5-2670 (2.6GHz/8-core/20MB/8.0GT-s QPI/115W, DDR3-1600, HT, Turbo2- 4/4/5/5/6/6/7/7)  
Intel® Xeon® E5-2667 (2.9GHz/6-core/15MB/8.0GT-s QPI/130W, DDR3-1600, HT, Turbo2- 3/3/3/4/5/6)  
Intel® Xeon® E5-2665 (2.4GHz/8-core/20MB/8.0GT-s QPI/115W, DDR3-1600, HT, Turbo2- 4/4/5/5/6/6/7/7)  
Intel® Xeon® E5-2660 (2.2GHz/8-core/20MB/8.0GT-s QPI/95W, DDR3-1600, HT, Turbo2- 5/5/6/6/7/7/8/8)  
Intel® Xeon® E5-2650 (2.0GHz/8-core/20MB/8.0GT-s QPI/95W, DDR3-1600, HT, Turbo2- 4/4/5/5/5/7/8/8)  
Intel® Xeon® E5-2650L (1.8GHz/8-core/20MB/8.0GT-s QPI/70W, DDR3-1600, HT, Turbo2- 2/2/3/3/4/4/5/5)  
Intel® Xeon® E5-2643 (3.3GHz/4-core/10MB/130W) Processor Kit  
Intel® Xeon® E5-2640 (2.5GHz/6-core/15MB/7.2GT-s QPI/95W, DDR3-1333, HT, Turbo2- 3/3/4/4/5/5)  
Intel® Xeon® E5-2637 (3.0GHz/2-core/5MB/8.0GT-s QPI/80W, DDR3-1600, HT, Turbo2- 5/5)  
Intel® Xeon® E5-2630 (2.3GHz/6-core/15MB/7.2GT-s QPI/95W, DDR3-1333, HT, Turbo2- 3/3/4/4/5/5)  
Intel® Xeon® E5-2630L (2.0GHz/6-core/15MB/8.0GT-s QPI/60W, DDR3-1333, HT, Turbo2- 3/3/4/4/5/5)  
Intel® Xeon® E5-2620 (2.0GHz/6-core/15MB/7.2GT-s QPI/95W, DDR3-1333, HT, Turbo2- 3/3/4/4/5/5)  
Intel® Xeon® E5-2609 (2.4GHz/4-core/10MB/6.4GT-s QPI/80W)  
Intel® Xeon® E5-2603 (1.8GHz/4-core/10MB/6.4GT-s QPI/80W)

**NOTE:** The Intel Xeon E5-2600 v2 Processor Family can only be configured with the new 1866MHz HPE Smart Memory or the new 1600MHz Low Voltage (1.35v) HPE Smart Memory. The previously shipping Intel Xeon E5-2600 Processor Family cannot be configured with the new 1866MHz HPE Smart Memory or the new 1600MHz Low Voltage (1.35v) HPE Smart Memory.

**NOTE:** DIMM slots 4 and 5 are not accessible when either the E5-2690, the E5-2643, the E5-2643 v2, or the E5-2637 v2, or the E5-2667 v2 is used. In a 2 processor configuration, there are twelve (12) total available DIMM slots.

**NOTE:** For the maximum supported memory speeds for each processor listed above, please reference the 'Memory Speed by Processor Model' table in the Memory section of the QuickSpecs.

**NOTE:** HT indicates that the processor model supports Intel® Hyper-Threading Technology.

**NOTE:** Turbo indicates the maximum potential frequency increment when using Intel® Turbo Boost Technology, with 8, 7, 6, 5, 4, 3, 2 or 1 core(s) active.

**NOTE:** DDR3 speed is the maximum memory speed of the processor. Actual memory speed may depend on the quantity and type of DIMMs installed.

**NOTE:** Up to 2 processors supported. Mixing different processor models is not supported.

**NOTE:** For the Intel® C600 Chipset E5-2600 Series, the letter preceding the model number indicates the Product Line (E3, E5, E7); 2600x, 2 = number of CPUs in a Node, 6 is socket/segment designation, 00 = Processor SKU, and x = L for low power SKUs.

**NOTE:** The WS460c Gen8 supports one or two processors.

**NOTE:** The WS460c Gen8 includes two I/O mezzanine expansion slots. A processor must be installed in processor slot 1 for access to the first mezzanine expansion slot (expansion slot 1). A processor must be installed in processor slot 2 for access to the second mezzanine expansion slot (expansion slot 2).

**NOTE:** All processors within the server must be identical.

## Standard Features

**NOTE:** All processors support Intel® Hyper-Threading and Intel® Turbo Boost Technologies except the E5-2603 and E5-2609.

**NOTE:** The letter "L" following the model number indicates denotes lower wattage.

**NOTE:** The processor model as well as the memory configuration determines the maximum speed memory can operate. Please see the see the "Memory" section later in this document.

**NOTE:** The Intel Xeon E5-2620 processor does not support DIMMs at 1.35V. Using the HPE RBSU, 1.35V DIMMs can be changed to operate at 1.5V.

**NOTE:** When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with any processors except the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2 all 16 DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs. When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with either the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2, all 12 available DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs.

---

**Cache Memory** 30MB (1x30MB) L3 cache  
One of the following **NOTE: For Twelve-core processors.**

depending on Model 25MB (1x25MB) L3 cache  
**NOTE: For Six, Eight or Ten-core processors.**

20MB (1x20MB) shared L3 cache  
**NOTE: For Eight-core processors.**

15MB (1x15MB) shared L3 cache  
**NOTE: For Quad or Six-core processors.**

10MB (1x10MB) shared L3 cache  
**NOTE: For Quad-core processors.**

5MB (1x5MB) Level 3 cache  
**NOTE: For Dual-core processors.**

---

**Chipset** Intel® C600 series  
Intel® E5-2600 and 2600v2 Processor Families  
**NOTE: For more information regarding Intel chipsets, see**  
**<http://www.intel.com/products/server/chipsets/>**

---

**Upgradeability** Upgradeable to two (2) processors

---

**On System Management Processor** HPE iLO (Firmware: HPE iLO 4)  
**NOTE: For more information, visit: <http://www.hp.com/go/ilo>**

---

**Memory Protection** Advanced ECC mode  
Memory Online Spare Mode (Rank Spare Mode)  
Lockstep Mode

---

**Memory** Type HPE SmartMemory

## Standard Features

|  |   |
|--|---|
|  | DDR3 Load Reduced (LRDIMM), Registered (RDIMM), or Unbuffered ECC (UDIMM)           |
| DIMM Slots Available                           | Sixteen (16) DIMM slots   |
| Standard (Pre-configured Models)               | 32GB (4 x 8GB) DDR3 1600MHz RDIMMs at 1.5V  |
| <b>One of the following depending on Model</b> |   |
| Maximum (LRDIMM)                               | 512GB (16 x 32GB) up to 1333MHz at 1.35V  |
| Maximum (RDIMM)                                | 256GB (16 x 16GB) up to 1600MHz at 1.5V<br>384GB (16 x 24GB) up to 1333MHz at 1.35V |
| Maximum (UDIMM)                                | 128GB (16 x 8GB) up to 1600MHz at 1.5V  |

**NOTE:** HPE memory from previous generation servers are not qualified or warranted with this server. HPE SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen8. For additional information, please see the HPE SmartMemory QuickSpecs at: <https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04111165>

**NOTE:** LRDIMM, RDIMM and UDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support RDIMM, UDIMM and LRDIMM.

**NOTE:** The internal USB 2.0 Port is not available when the HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits (700404-B21) are used.

**NOTE:** When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with any processors except the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2 all 16 DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs. When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with either the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2, all 12 available DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs.

**NOTE:** The Intel Xeon E5-2600 Processor Family cannot be configured with the new 1866MHz HPE Smart Memory or the new 1600MHz Low Voltage (1.35v) HPE Smart Memory.

**NOTE:** Depending on the memory configuration and processor model, the memory speed may run at 1866MHz, 1600MHz, 1333MHz, or 1066MHz. Please see Memory Population Table or the Online Memory Configuration Tool at: <http://www.hp.com/go/ddr3memory-configurator>.

---

### Network Controller Pre-configured Models

One of the following depending on Model One (1) HPE Flex-10 10Gb 2-port 530 FlexLOM

#### Configurable Models

One FlexibleLOM from below.

One (1) HPE Flex-10 10Gb 2-port 530 FlexLOM or

One (1) HPE FlexFabric 10Gb 2-port 534FLB FlexibleLOM or HPE FlexFabric 10Gb 2-port 554FLB FlexibleLOM, HPE FlexFabric 20Gb 2-port 630FLB

**NOTE:** Windows 7, directly presiding on system (i.e. "OS on bare-metal"), is supported only with HPE Flex-10 10Gb 2-port 530FLB or HPE FlexFabric 10Gb 2-port 534FLB FlexibleLOM with basic network functions only. All other adapters supported with use on server OS or hypervisor environment only.

**NOTE:** FlexFabric supported only with server OS and/or in a virtualized environment using hypervisors.

**NOTE:** Supports FCoE, Flex-10, TCP/IP offload engine, hardware-based accelerated iSCSI, iSCSI boot,

## Standard Features

and autosensing 10Gb/1Gb Ethernet.

**NOTE:** Each port is autosensing 1Gb/10Gb, and can interoperate with 1Gb HPE BladeSystem c-Class interconnect components. Both ports will operate at the same speed.

**NOTE:** FlexFabric capabilities require the use of an HPE Virtual Connect FlexFabric module. Fibre Channel over Ethernet (FCoE) is supported with the HPE 10GbE Pass-Thru Module, HPE 6120XG Blade Switch with the CEE license installed, HPE Cisco B22HPE Fabric Extender and HPE Cisco B22HPE Fabric Extender with 16 FET for BladeSystem c-Class. Learn more at:

<http://www.hp.com/go/bladesystem/interconnects>

**NOTE:** FlexibleLOMs are not compatible with prior generation c-Class server blades

Standard iLO Network Controller:

One (1) 10/100 Mbps port for the HPE iLO 4 to Onboard Administrator link. The Onboard Administrator (with 10/100/1000 Mbps) to BladeSystem link is 1Gbps.

---

## Expansion Slots

Two (2) I/O expansion mezzanine slots: (One occupied and second not available when “2<sup>nd</sup> slot enablement kit” is installed with expansion blade)

- x16 PCIe 3.0 Type A (supports Type A mezzanine cards) (expansion slot 1).  
**NOTE:** This expansion slot supports AMD FirePro S4000X.
- x16 PCIe 3.0 Type B (supports Type A and Type B mezzanine cards (expansion slot 2).  
**NOTE:** This expansion slot supports NVIDIA Quadro K3100M or AMD FirePro S4000X.  
**NOTE:** A second processor must be installed (in processor slot 2) to have access to the second expansion slot (expansion slot 2).  
**NOTE:** When NVIDIA Quadro K3100M card is ordered for Mezz slot 2, no other cards may be ordered for Mezz slot 1.  
**NOTE:** Supports both single and dual Mezz Graphics configuration with AMD FirePro S4000X mezzanine graphics.
- Two (2) Full-size PCIe expansion slots (available with expansion blade only).
  - x16 PCIe 2.0 full-size, full-length PCIe card expansion slot  
**NOTE:** Supported only with qualified select HPE PCIe cards listed in this document.
- Mezzanine card options include:
  - Dual-port 8Gb or 16Gb Fibre Channel HBA for SAN connectivity.
  - QDR and FDR InfiniBand for low latency and high bandwidth server interconnectivity.

---

## HPE Server ROM

HPE ROM (read only memory) is now digitally signed using Hewlett Packard Enterprise's Corporate Signing Service. This signature is verified before the flash process starts, reducing accidental programming and preventing malicious efforts to corrupt system ROM.

HPE ROM provides for essential initialization and validation of hardware components before control is passed to the customer-installed operating system. The ROM also provides the capability of booting from various fixed media (HDD, CD-ROM) and removable media (USB), to continue operation to the operating system. HPE ROM performs very early configuration of the video controller, to allow monitoring of initialization progress via an attached monitor. If configuration or hardware errors are discovered during this early phase of hardware initialization, suitable messages are now displayed on the connected monitor. Additionally, these configuration or hardware errors are logged to the Integrated Management Log (IML) to assist in diagnosis. The HPEProLiant ROM is used to configure the following:

- Processor and chipset status registers
- System memory, memory map, and memory initialization

## Standard Features

- System hardware configuration (integrated PCI devices and optional PCIe cards).
- Customer-specific BIOS configuration using the HPE ROM-Based Setup Utility (RBSU).

**NOTE:** For further information, please refer to the HPE RBSU (ROM based setup utility) user guide: <http://www.hp.com/support/rbsu>

|                           |            |  |
|---------------------------|------------|--|
| <b>Storage Controller</b> | All Models | One (1) HPE Smart Array P220i/P230i Controller with 512MB of flash backed write cache (FBWC), RAID 0 and 1 support, and upgradeable firmware with recovery ROM |
|                           |            | <b>NOTE:</b> The HPE Smart Array P220i/P230i supports two (2) small form factor (SFF) hot plug drive bays.   |
|                           |            | <b>NOTE:</b> The server supports up to a combined total of two (2) FBWC battery options.   |

|  |       |                  |       |
|--|-------|------------------|-------|
| <b>Maximum Internal Storage</b>                | 4.0TB | 2 x 2.0TB drives | 4.0TB |
| <b>One of the following depending on Model</b> | 4.0TB | 2 x 2.0TB drives | 4.0TB |
|  | 3.2TB | 2 x 1.6TB drives | 3.2TB |
|  | 3.2TB | 2x1.6TB drives   | 3.2TB |

**NOTE:** The ProLiant WS460c Gen8 server includes the new HPE hot plug small form factor (SFF) SmartDrive carrier for enhanced management and reduced maintenance errors. HPE drives from previous generation servers are not compatible with the WS460c Gen8 drive bays.

|                   |                 |  |
|-------------------|-----------------|--|
| <b>Interfaces</b> | Micro SDHC Slot | One (1) internal Micro Secure Digital High Capacity (Micro SDHC) card slot   |
|                   | USB 2.0 Port    | One (1) internal USB 2.0 connector for USB flash media drive keys  |
|                   |                 | <b>NOTE:</b> The above options are for integrated hypervisor virtualization environments needing a low cost boot solution with the highest performance and reliability.                      |
|                   |                 | <b>NOTE:</b> The internal USB 2.0 Port is not available when the HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits (700404-B21) are used. |

## Standard Features

### **Citrix XenServer**

VMware Horizon View 5.2, vSphere 5.1 or later

### **Microsoft Windows Server**

**NOTE:** For more information on the Hewlett Packard Enterprise Certified and Supported ProLiant Servers for OS and Virtualization Software and latest listing of software drivers available for your server, please visit our Support Matrix at: <http://www.hp.com/info/ossupport> and our driver download page <http://www.hp.com/support/WS460cGen8>

---

## Enclosures

Hewlett Packard Enterprise offers two different c-Class Graphics Server Blade enclosures to meet your individual needs:

- The HPE BladeSystem c7000 rack enclosure is 10U high and holds up to sixteen (16) ProLiant WS460c Gen8 workstations plugged vertically or (8) HPE ProLiant WS460c Gen8 Graphics Server Blades paired with (8) HPE WS460c Gen8 Graphics Expansion Blades plugged vertically.
- The HPE BladeSystem c3000 rack enclosure is 6U high and holds up to eight (8) HPE ProLiant WS460c Gen8 workstations plugged horizontally or (4) HPE ProLiant WS460c Gen8 Graphics Server Blades paired with (4) HPE WS460c Gen8 Graphics Expansion Blades plugged horizontally.
- Graphics Server Blades, server blades, storage blades, interconnect modules, power supplies, fans, and redundant Onboard Administrator modules are all designed to fit into the c3000 and c7000 enclosures.

For additional enclosure information, please see:

<http://h18004.www1.hp.com/products/ blades/ components/ enclosures/ c-class/ index.html>

---

## Mezzanine Support

- Two (2) I/O expansion or graphics adapter mezzanine slots
- Supports up to (2) mezzanine cards

---

## Graphics

Integrated Matrox G200 video standard

- 1280 x 1024 (32 bpp)
- 1920 x 1200 (16 bpp)

HPE iLO 4 On System Management Memory

- 16 MB Flash
- 256 MB DDR 3 with ECC (112 MB after ECC and video)

---

## Form factor

HPE ProLiant WS460c Gen8 and WS460c Gen8 Graphics Expansion Blade are both half-height server blades that plug into the HPE BladeSystem c3000 and c7000 enclosures. HPE WS460c Gen8 is a single-width blade while the Graphics Expansion Blade model is double-width.

---

## On System Management

HPE iLO Management Engine

- HPE iLO Management Engine is a comprehensive set of embedded management features supporting the complete lifecycle of the server, from initial deployment, through ongoing management, to service alerting and remote support.  
HPE iLO Management Engine comes standard on all HPE ProLiant Gen8 servers.

### **The HPE iLO Management Engine portfolio includes:**

- **HPE iLO:** The HPE iLO management processor is the core

## Standard Features

foundation for other capabilities within HPE iLO Management Engine.

- **HPE Agentless Management** Provides built in server health monitoring and alerting capability without OS agents, that starts working the moment a power cord and an Ethernet cable are connected.
- **HPE Active Health System:** Always on, continuous monitoring for increased stability and shorter downtimes; 100% configuration history; Health and service alerts and easy export and upload to Service and Support.
- **HPE Intelligent Provisioning:** Lets customers provision and configure a single server without any separate media. No more SmartStart CDs or Smart Update Firmware DVD are needed To start Intelligent Provisioning:
  - Press the F10 key during the ProLiant Gen8 server boot process (also known as power on self-test or POST).
  - Please go to the Intelligent Provisioning website at <http://www.hp.com/go/intelligentprovisioning> for additional information and to view usage videos.
  - Use the Service Pack for ProLiant (SPP) at <http://www.hp.com/go/spp> to get firmware and software updates.
- **HPE iLO Mobile App:** Enables the ability to access, deploy, and manage your server anytime from anywhere from select smartphones and mobile devices. For additional information please visit: <http://www.hp.com/go/ilo/mobileapp>

**NOTE:** For more information, visit: <http://www.hp.com/go/ilo> or HPE iLO Management Engine technologies whitepaper.

---

### HPE Insight Management

HPE Service Pack for ProLiant (SPP)

HPE Service Pack for ProLiant (SPP) and HPE Smart Update Manager (HPE SUM) provide a comprehensive approach to firmware and system software maintenance. Together they provide better operating stability and ensure maximum uptime. The SPP will be updated at a predictable cadence, typically coinciding with new HPE server hardware launches. By enabling firmware to be updated online and integrating firmware and system software updates in one operation, HPE SUM and the SPP offer faster updates of individual servers and dramatically faster updates of entire BladeSystem enclosures. Further improving system uptime and stability is the fact that Hewlett Packard Enterprise provides 12 months of support for each Service Pack for ProLiant release.

The user experience around HPE SUM and the SPP has been improved in several ways, starting with the web download. A single web page provides access to a single download containing both the latest version of HPE SUM and the latest SPP. Optional smaller subsets with only specific types of servers or specific operating systems are offered to save on download time. The HPE SUM application provides a straightforward, intuitive user interface that guides the user through the steps of

## Standard Features

discovery, analyses and update, providing comprehensive information on available updates, criticality and interdependencies. This information is also available in reports. By providing the option of multiple local or shared repositories which can be easily updated from hp.com, HPE SUM provides the tools to optimize stability and consistency throughout the company. While HPE SUM and the SPP recommend the combinations of firmware and system software that Hewlett Packard Enterprise has found to be the best practice, the application gives customers the flexibility to set their own specific baseline.

The Service Pack for ProLiant has been rigorously tested with specific attention for interaction between firmware, drivers and agents both within the server as well as in interaction with the BladeSystem enclosure components (Onboard Administrator and Virtual Connect). This testing ensures the highest quality as well as providing the input for HPE SUM to deploy updates taking into account all interdependencies, when determining the correct updates and order of update deployment.

**NOTE: The Service Pack for ProLiant (which includes HPE SUM) can be downloaded from <http://www.hp.com/go/spp/download>. More information can be found: <http://www.hp.com/go/SmartUpdate>, <http://www.hp.com/go/spp> and <http://www.hp.com/go/hpsum>**

---

### Security

- Power-on password
- Administrator's password
- HPE iLO 4 On System Management Chipset with:
  - SSL encryption
  - Secure Shell version 2
  - Advanced Encryption Standard (AES) and Triple Data Encryption Standard (3DES) on browser, CLP and XML scripting interface
  - AES and RC4 encryption of video
- External USB port enable/disable
- Network server mode
- Serial interface control
- TPM (Trusted Platform Module) 1.2 option
- Advanced Encryption Standard (AES)
- Intel® Advanced Encryption Standard-New Instructions (AES-NI)

---

### Availability

#### Memory

- Advanced ECC uses single device data correction (SDDC) to detect and correct single and all multi-bit error that occurs within a single DRAM chip. Both x4 and x8 SDDC are supported (x8 requires lockstep mode).
- Memory online spare mode (also known as rank spare mode) detects a rank that is degrading and switches operation to the spare rank.
- Memory Lockstep mode is used to correct a single x8 DRAM device failure on a DIMM. The DIMMs in each paired memory channel must have identical Hewlett Packard Enterprise part numbers.
- Memory demand and patrol scrubbing to prevent accumulation of correctable errors and reducing the likelihood of unplanned downtime.
- Failed DIMM isolation improves the service time thus improving the overall system availability.
- Address parity protection available on RDIMMs and LRDIMMs detects address bit errors to improve service time and overall system availability.

#### Storage

- Two (2) Small Form Factor hot-plug SAS/SATA/SSD drive bays.
- Integrated HPE Smart Array P220i Controller with 512MB FBWC, RAID 0 and 1 support, and

## Standard Features

upgradeable firmware with recovery ROM capability.

- Optional HPE D2200sb Storage Blade for direct attachment of up to 12 drives to an adjacent blade within the c-Class enclosure. (Available with single-width WS460c only)
- Optional dual-port Fibre Channel mezzanine card for redundant SAN connections. (With configurations where mezzanine slot is available)

### Processor/Chipset

- Processor internal sensors & thermal control protection against over-temperature conditions.
- Cache parity/ECC protects cache data from accidental data corruption.
- Machine Check Architecture (MCA) detects and captures hardware errors such as system bus, memory ECC, parity, and cache, and improves service time.
- Intel® QPI Protocol Protection allows detection of data errors using a checksum of 8-bits.
- Core Disable for FRB (fault resilient boot) allows a system to power-on despite a failing core-pair. It uses BIST (built-in self-test) results to detect a failure and disables the target core-pair upon subsequent boot.

### Blade Enclosure Infrastructure

- Pooled power for true N+N power redundancy through up to six (6) hot-plug, high-efficiency, common slot enclosure-based power supplies (configuration dependent).
- Up to ten (10) redundant enclosure-based hot-plug HPE Active Cool fans that scale to meet future demands and optimize airflow, reduce power draw, and improve acoustic performance.
- Dual grid power providing redundant rack enclosure power feeds to the server blade enclosure.
- HPE Dynamic Power Saver Mode the total enclosure power consumption is monitored in real time and automatically adjusted with changes in demand for improved efficiency and reliability.
- HPE Dynamic Power Capping safely limits power usage without impacting performance by capping peak usage instead of average power usage, removes risk to electrical infrastructure with a fast-acting, hardware-based capping algorithm, and reclaims more power by dynamically controlling power limits based on workload demand.
- Up to eight interconnect modules per server blade enclosure providing four simultaneous redundant fabrics for FlexFabric, Virtual Connect Ethernet, Fibre Channel, InfiniBand, Pass Thru Ethernet, etc.
- Enclosure crosslinks between adjacent enclosures to provide interconnect module-to-module connections or as Virtual Connect module stacking links.
- Optional enclosure redundant Onboard Administrator system management module.

---

## Warranty

- This product is covered by a global limited warranty and supported by Hewlett Packard Enterprise Services and a worldwide network of Hewlett Packard Enterprise Authorized Channel Partners. Hardware diagnostic support and repair is available for three years from date of purchase. Support for software and initial setup is available for 90 days from date of purchase. Enhancements to warranty services are available through HPE Pointnext operational services or customized service agreements. Certain restrictions and exclusions apply. Hard drives have either a one year or three year warranty; refer to the specific hard drive QuickSpecs for details.  
**NOTE: Server/Workstation warranty includes 3 year Parts, 3 year Labor, 3-year on-site support. Warranty repairs may be accomplished through the use of Customer Self Repair (CSR) parts. These parts fall into two categories: 1) Mandatory CSR parts are designed for easy replacement. A travel and labor charge will result when customers decline to replace a Mandatory CSR part; 2) Optional CSR parts are also designed for easy replacement but may involve added complexity. Customers may choose to have Hewlett Packard Enterprise replace Optional CSR parts at no charge. Additional information regarding worldwide limited warranty and technical support is available at:**  
**<http://h18004.www1.hp.com/products/servers/platforms/warranty/index.html>**

## Optional Features

### Graphics Adapter

- AMD FirePro S4000X graphics (Single or dual cards configuration capable)
  - For professional 2D & 3D graphics with hardware acceleration via graphics subsystem
  - 2GB (GDDR5) memory
  - Supports up to six displays
  - Mezzanine card can occupy either mezzanine slot 1 and/or 2
  - Windows 7 Pro (64-bit) OS directly presiding on system (i.e. "OS on bare-metal") support only
- NVIDIA Quadro K3100M graphics (Single card configuration only)
  - Workstation class performance for ultra-high-end professional 3D graphics
  - 4GB (GDDR5) memory
  - Supports up to two displays by default firmware. Up to four displays can be supported by using firmware edition 80.04.F1.00.01 and driver 331.82b or later.
  - Mezzanine card which occupies mezzanine slot 2
  - GPU Pass-through with
    - Citrix XenDesktop 5.6 FP1 Enterprise/Platinum, XenServer 6 Enterprise / Platinum edition
    - VMware Horizon View 5.2 and vSphere5.1

### Full-size PCI Express Adapters For WS460c Graphics Expansion Blade:

- NVIDIA GRID K1GPU adapter
  - For VDI acceleration delivering true PC graphics experience
  - Four entry class GPU
  - 4GB (DDR3) memory per GPU, total of 16GB
  - Supports shared graphics, pass-through and hardware GPU virtualization
  - PCIe Gen3, x16 double-width card (One per Graphics Expansion Blade)
  - Available only with Intel® Xeon® E5-2600 v2 series processor configuration
- NVIDIA GRID K2 GPU adapter
  - For VDI acceleration delivering true PC graphics experience
  - Two high-end GPU
  - 4GB (GDDR5) memory per GPU, total of 8GB
  - Supports shared graphics, pass-through and hardware GPU virtualization
  - o PCIe Gen3, x16 double-width card (One per Graphics Expansion Blade)
  - Available only with Intel® Xeon® E5-2600 v2 series processor configuration
- NVIDIA Quadro K4000 (Single-width PCIe x16 in graphics expansion blade)
  - For professional high end 3D graphics and VDI acceleration
  - 3GB (GDDR5) memory
  - Supports up to four displays per card
  - PCIe Gen2, x16 single-width card (Two per Graphics Expansion Blade can be supported.)
  - GPU Pass-through with
    - Citrix XenDesktop 5.6 Enterprise/Platinum, XenServer 6 Enterprise / Platinum editions
    - VMware View Horizon 5.2, vSphere 5.1
- NVIDIA Quadro K5000 (Double-width PCIe x16 in graphics expansion blade)
  - For professional ultra-high-end 3D graphics and VDI acceleration
  - 4GB (GDDR5) memory
  - Supports up to four displays
  - PCIe Gen2, x16 double-width card (One per Graphics Expansion Blade)
  - GPU Pass-through with
    - Citrix XenDesktop 5.6 Enterprise/Platinum, XenServer 6 Enterprise / Platinum

## Optional Features

- editions
  - VMware View Horizon 5.2, vSphere 5.1
- NVIDIA Quadro K6000 (Double-width PCIe x16 in graphics expansion blade)
  - For ultra-high-end 3D graphics requiring large-scale visualization and VDI acceleration
  - 12GB (GDDR5) memory
  - Supports up to four displays
  - PCIe Gen3, x16 double-width card (One per Graphics Expansion Blade)
  - GPU Pass-through with
    - Citrix XenDesktop 5.6 Enterprise/Platinum, XenServer 6 Enterprise / Platinum editions
    - VMware View Horizon 5.2, vSphere 5.1
- HPE MultiGPU with six NVIDIA Quadro K3100M
  - Three NVIDIA Quadro K3100M per HPE Multi GPU carrier adapter. Required to use in a set of two HPE Multi GPU cards for total six NVIDIA Quadro K3100M GPUs
  - For VDI acceleration in pass-through mode with Citrix XenServer and VMware vSphere
  - PCIe-x16, Gen2
  - GPU Pass-through with
    - Citrix XenDesktop 5.6 Enterprise/Platinum, XenServer 6 Enterprise / Platinum editions
    - VMware View Horizon 5.2, vSphere 5.1
  - Available only with Intel® Xeon® E5-2600 v2 series processor configuration
- NVIDIA Tesla K20 5GB Computational Accelerator
  - For High Performance Computing (GPGPU acceleration)
  - 2496 CUDA cores
  - 1.17 Tflops of double-precision peak performance
  - 3.52 Tflops of single-precision peak performance
  - PCIe Gen2
- NVIDIA Tesla K20X 6GB Computational Accelerator (Qualified. Factory integration not available)
  - For High Performance Computing (GPGPU acceleration)
  - 2688 CUDA cores
  - PCIe Gen2
  - 1.32 Tflops of double-precision peak performance
    - 3.95 Tflops of single-precision peak performance
  - PCIe Gen2

---

### Fibre Channel Support

When vacant mezzanine slot is available on WS460c, one optional Fibre Channel mezzanine HBA is supported on the HPE ProLiant WS460c Gen8 with server OS or hypervisors. Windows client OS (Windows 7) not supported.

---

### Compatible SAN

HPE ProLiant WS460c Gen8 graphics server blades are optimized for HPE MSA, EVA and XP. HPE ProLiant WS460c Gen8 graphics server blades are compatible with select 3rd party SANs. Please see blade storage page for more details at:

<http://h18004.www1.hp.com/products/ blades/ components/ c-class-sans.html>

---

### HPE Virtual Connect

HPE Virtual Connect is an interconnect option for BladeSystem c-Class that simplifies server connectivity to data and storage networks, and reduces costs. Unique HPE Flex-10 technology makes maximum use of network bandwidths, provide dynamic tuning and enable extreme flexibility to meet individual server and infrastructure requirements by allocating up to 4 network connections per server port. Virtual Connect FlexFabric modules extend those capabilities to allocate one function per port to storage connections. HPE

## Optional Features

Virtual Connect Enterprise Manager (VCEM) provides server management software with a central console to administer network connections and workloads for thousands of servers. For more information on Virtual Connect Enterprise Manager, see <http://www.hp.com/go/vcem>. For more information on Virtual Connect Ethernet, Fibre Channel, Converged Network and management options, see <http://www.hp.com/go/virtualconnect>.

---

### HPE Insight Management

HPE Insight Control HPE Insight Control, a product option, delivers essential infrastructure management that can help save time and money by making it easy to deploy, migrate, monitor, remote control, and optimize your IT infrastructure through a single, simple management console. For more information, see <http://www.hp.com/go/insightcontrol>.

HPE Insight Control includes one year of 24 x 7 HPE Software Technical Support and Update Service ensuring rapid access to Hewlett Packard Enterprise support staff and proactive delivery of software updates. For more information about this service, see <http://www.hp.com/services/insight>.

HPE Matrix Operating Environment The HPE Matrix Operating Environment (Matrix OE) for ProLiant and Integrity servers is an integrated command center that helps you instantly adjust to dynamic business demands. This advanced infrastructure management software lets you reduce the cost of common data center tasks by up to 40 percent while keeping pace with your changing business.

The HPE Matrix OE includes the automated provisioning, optimization, and recovery management capabilities for HPE CloudSystem Matrix, the ideal platform for private cloud and Infrastructure as a Service (IaaS). For more information, see <http://www.hp.com/go/matrixoe>.

HPE iLO Advanced License for ProLiant BladeSystem Servers HPE iLO management processors for HPE ProLiant Gen8 servers helps simplify server setup, engage health monitoring and power and thermal control, and promote remote administration. HPE iLO functions out-of-the-box without additional software installation and functions regardless of the servers' state of operation. The HPE iLO can be accessed from any location via a web browser and works hand-in-hand with HPE Systems Insight Manager, Insight Control, and Matrix Operating Environment, helping customers unleash the value of the ProLiant platform and deliver the highest possible quality of IT service to the business. Advanced functionality, such as graphical remote console, multi-user collaboration, and video record/playback can be activated with the optional HPE iLO Advanced or HPE iLO Advanced for BladeSystem licenses. The Advanced licensed features offer sophisticated remote administration of servers in dynamic data center and remote locations and can help significantly reduce cost associated with IT-related travel and unplanned downtime.

**NOTE:** For more information, visit <http://www.hp.com/go/ilo>.

---

### HPE OneView

The HPE OneView architecture combines server, storage, and networking with control of datacenter environmental into a single, integrated management platform. Architected to deliver lifecycle management for the complete Converged Infrastructure, it facilitates collaboration, removes friction, collapses cycle times, eliminates error-prone work, and accelerates time to value. HPE OneView v1.1 combines management of servers and virtual connect with open integration to automate and customize existing tools and processes. With OneView, you'll work smarter-with greater visibility and control-and fully capitalize on the benefits of a Converged Infrastructure.

## Optional Features

For more information on HPE OneView management, see: <http://www.hp.com/go/oneview>.

---

### High Performance Clusters

HPE Cluster Platforms HPE Cluster Platforms are specifically engineered, factory-integrated large-scale ProLiant clusters optimized for High Performance Computing, with a choice of servers, networks and software. Operating system options include specially priced offerings for Red Hat Enterprise Linux and SUSE Linux Enterprise Server, as well as Microsoft Windows HPC Server. A Cluster Platform Configurator simplifies ordering. <http://www.hp.com/go/clusters>

HPE HPC Interconnects

High Performance Computing (HPC) interconnect technologies are available for this server as part of the HPE Cluster Platform portfolio. These high-speed InfiniBand and Gigabit interconnects are fully supported by Hewlett Packard Enterprise when integrated within an HPE cluster. Flexible, validated solutions can be defined with the help of configuration tools. <http://www.hp.com/techservers/clusters/ucp/index.html>

HPE Insight Cluster Management Utility

HPE Insight Cluster Management Utility (CMU) is an HPE-licensed and HPE-supported suite of tools that are used for lifecycle management of hyperscale clusters of Linux ProLiant systems. CMU includes software for the centralized provisioning, management and monitoring of nodes. CMU makes the administration of clusters user friendly, efficient, and effective. <http://www.hp.com/go/cmu>

---

### HPE Insight Online

HPE Insight Online is a new addition to the HPE Support Center for one stop, secure access to product and HPE support information personalized to your IT environment. Insight Online can automatically display devices remotely monitored by HPE Insight Remote Support. With Insight Online's easy navigation you can efficiently track your IT support contracts and device status from anywhere and at anytime. <http://www.hp.com/go/insightonline>

---

### Expansion Blade Support

Supports one (1) optional storage, tape, or PCI expansion blade.

---

### Factory Express Portfolio for Servers and Storage

HPE Factory Express offers configuration, customization, integration and deployment services for Hewlett Packard Enterprise servers and storage products. Customers can choose how their factory solutions are built, tested, integrated, shipped and deployed.

Factory Express offers service packages for simple configuration, racking, installation, complex configuration and design services as well as individual factory services, such as image loading, asset tagging, and custom packaging. Hewlett Packard Enterprise products supported through Factory Express include a wide array of servers and storage: HPE Integrity, HPE ProLiant, HPE ProLiant Server Blades, HPE BladeSystem, HPE 9000 servers as well as the MSAxxxx, VA7xxx, EVA, XP, rackable tape libraries and configurable network switches.

For more information on Factory Express services on your specific server model please contact your sales representative or go to: <http://www.hp.com/go/factory-express>.

---

### HPE Simple Configurator

SCE is a guided self-service tool to help sales and non-technical people provide customers with initial configurations in 3 to 5 minutes. You may then send the configuration on for configuration help, or use in your existing ordering processes. If you require "custom" rack configuration or configuration for products not available in SCE, please contact the HPE Customer Business Center or an Authorized Partner for assistance. <http://www.hp.com/products/configurator>

## Service and Support

### Service and Support HPE Technology Services for Industry Standard Servers

HPE Technology Services delivers confidence, reduces risk and helps customers realize agility and stability. Connect to Hewlett Packard Enterprise to help prevent problems and solve issues faster. Our support technology lets you to tap into the knowledge of millions of devices and thousands of experts to stay informed and in control, anywhere, any time.

### Protect your business beyond warranty with HPE Pointnext operational services

HPE Pointnext operational services enable you to order the right service level, length of coverage and response time as you purchase your new server, giving you full entitlement for the term you select.

---

## Recommended HPE Pointnext operational services for your HPE product

### Optimized Care

#### HPE Proactive Care Advanced - 24x7 coverage, three year Care Pack Service

Achieve a higher return on your product investment with the personal attention from a locally assigned Account Support Manager who delivers recommendations designed to improve availability and performance. Leverage your system's ability to connect to Hewlett Packard Enterprise for automated problem detection and rapid critical event management to increase stability and reduce unplanned downtime. This recommendation provides 24x7 coverage with four-hour response for hardware and two-hour callback for supported software. Collaborative call management comes with Proactive Care Advanced or you may choose full support from Hewlett Packard Enterprise where we own all cases through to resolution. Hewlett Packard Enterprise is a leading provider of support services for most operating systems used on HPE BladeSystem with long, successful partnerships with vendors such as Microsoft, Red Hat, VMware, SUSE and others.

Purchasing software support from Hewlett Packard Enterprise simplifies troubleshooting and shortens time to resolution with one call for hardware or software questions.

<https://www.hpe.com/h20195/V2/GetDocument.aspx?docname=4AA5-3259ENW&cc=us&lc=en>

---

### Standard Care

#### HPE Proactive Care with 24x7 coverage, three year Care Pack Service

HPE Proactive Care helps prevent problems and stabilize IT by utilizing secure, real-time, predictive analytics and proactive consultations when your products are connected to Hewlett Packard Enterprise. This Care Pack Service combines three years' proactive reporting and advice with our 24x7 coverage and enhanced escalation management, four hour hardware response time and two hour call back for software questions on leading industry standard software running on your HPE ProLiant server.

<https://www.hpe.com/h20195/v2/getpdf.aspx/4aa3-8855enw.pdf>

---

### Related Services

#### HPE ProLiant Server Hardware Installation

Provides for the basic hardware installation of Hewlett Packard Enterprise branded servers, storage devices and networking options to assist you in bringing your new hardware into operation in a timely and professional manner. <http://h20195.www2.hp.com/V2/GetPDF.aspx/5981-9356EN.pdf>

#### Factory Express for Servers and storage

HPE Factory Express offers configuration, customization, integration and deployment services for Hewlett Packard Enterprise servers and storage products. Customers can choose how their factory solutions are built, tested, integrated, shipped and deployed. For more information on Factory Express services for your specific server model please contact your sales representative or go to: <http://www.hp.com/go/factory-express>.

#### Data Privacy Services

Protect your data through better media management. HPE Data privacy services help manage and protect

---

## Service and Support

sensitive data to reduce the risk of unauthorized access to private information and help meet compliance requirements. Our retention services allow you to keep drives and other devices upon failure, our removal services provide convenient data sanitization and our recovery services allow you to safely retire IT assets and capture any remaining value from the hardware. <http://www.hp.com/services/dataprivacy>

Additional HPE Pointnext operational services can be found at: <http://www.hp.com/go/cpc>

---

### Get connected to Hewlett Packard Enterprise to improve your support experience

Connecting products to Hewlett Packard Enterprise will help prevent problems with 24x7 monitoring, prefailure alerts, automatic call logging, and parts dispatch, plus current data will be available for the proactive reports that are part of Proactive Care Services. With Connected products, you can have a dashboard to manage your IT anywhere, anytime, from any device.

---

### HPE Support Center

Personalized online support portal with access to information, tools and experts to support Hewlett Packard Enterprise business products. Submit support cases online, chat with Hewlett Packard Enterprise experts, access support resources or collaborate with peers. Learn more <http://www.hp.com/go/hpsc>

The HPE Support Center Mobile App allows you to resolve issues yourself or quickly connect to an agent for live support. Now, you can get access to personalized IT support anywhere, anytime.

HPE Insight Remote Support and HPE Support Center are available at no additional cost with a Hewlett Packard Enterprise warranty, HPE Care Pack or Hewlett Packard Enterprise contractual support agreement.

**NOTE:** HPE Support Center Mobile App is subject to local availability.

---

### Parts and Materials

Hewlett Packard Enterprise will provide HPE-supported replacement parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements.

Parts and components that have reached their maximum supported lifetime and/or the maximum usage limitations as set forth in the manufacturer's operating manual, product quick-specs, or the technical product data sheet will not be provided, repaired, or replaced as part of these services.

The defective media retention service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction.

---

### For more information

To learn more on HPE ProLiant servers and HPE BladeSystem servers, please contact your Hewlett Packard Enterprise sales representative or Hewlett Packard Enterprise Authorized Channel Partner. Or visit: <http://www.hp.com/services/bladesystem>

## Configuration Information - Factory Integrated Models

**NOTE:** This section lists some of the steps required to configure a Factory Integrated Model. To ensure only valid configurations are ordered, Hewlett Packard Enterprise recommends the use of an Hewlett Packard Enterprise approved configurator. Contact your local sales representative for information on CTO product offerings and requirements.

**NOTE:** Configure-to-order server blades must start with a CTO Blade Server.

**NOTE:** FIO indicates that this option is only available as a factory installable option.

**NOTE:** All Factory Integrated Models will be populated with sufficient hard drive blanks based on the number of initial hard drives ordered with the server.

### Step 1: Base Server Blade Configuration (Select a configurable Blade)

#### HPE Models

HP ProLiant WS460c Gen8 E5-v2 Configure-to-order Workstation

739347-B21

**NOTE:** Single-width, half-height blade with two mezzanine card slots available.

**NOTE:** HPE Smart Array P220i Controller FIO Kit (690164-B21) or HPE Smart Array P230i Controller FIO Kit (735062-B21) must be added separately as part of the Server Blade Configuration Process. Choose one of the controllers in Step 3.

#### Configurable Model ships with:

One (1) FlexibleLOM connector providing a choice for one (1) of the supported 10Gb or 20Gb FlexibleLOMs (see Step 2)

Two (2) HPE small form factor hot-plug SAS/SATA/SSD hard drive bays

Two (2) x16 PCIe I/O expansion slots (one Type A, one Type A/B)

One (1) integrated USB connector and one (1) MicroSDHC connector

One (1) TPM connector

HPE iLO Management Engine (standard)

#### Configurable Model ships with:

One (1) FlexibleLOM connector providing a choice for one (1) of the supported 10Gb or 20Gb FlexibleLOMs (see Step 2)

One (1) HPE Smart Array P220i Controller with 512MB FBWC and RAID 0 and 1 support

Two (2) HPE small form factor hot-plug SAS/SATA/SSD hard drive bays

Two (2) x16 PCIe I/O expansion slots (one Type A, one Type A/B)

One (1) integrated USB connector and one (1) MicroSDHC connector

One (1) TPM connector

HPE iLO Management Engine (standard)

HP WS460c Gen8 E5-v2 Graphics Expansion Configure-to-order Blade

739348-B21

**NOTE:** Double-width half-height blade with two, full-length, PCIe x16 slots. No mezzanine card slots on base blade are currently available.

**NOTE:** HPE Smart Array P220i Controller FIO Kit (690164-B21) or HPE Smart Array P230i Controller FIO Kit (735062-B21) must be added separately as part of the Server Blade Configuration Process. Choose one of the controllers in Step 3.

**NOTE:** Base unit comes only with Slot1 of the expansion blade enabled. To enable Slot2, optional Slot2 Enablement FIO Kit (PN 721120-B21) is required. This kit is available at time of initial purchase only.

#### Configurable Model ships with:

One (1) FlexibleLOM connector providing a choice for one (1) of the supported 10Gb or 20Gb FlexibleLOMs (see Step 2)

Two (2) HPE small form factor hot-plug SAS/SATA/SSD hard drive bays

Two (2) x16 PCIe I/O expansion slots (one Type A, one Type A/B)

One (1) integrated USB connector and one (1) MicroSDHC connector

## Configuration Information - Factory Integrated Models

One (1) TPM connector  
HPE iLO Management Engine (standard)

### Step 2: Choose Required Options (one of the following from each list unless otherwise noted)

#### HPE Processors

**NOTE:** If two processors are desired, select one xxxxxx-L21 here in Step 2 and one xxxxxx-B21 in Step 4.

#### E5-2600 v2 series Processors

|  |            |

#### E5-2600 series Processors

|  |            |
|--|------------|
| HP BL460c Gen8 Intel Xeon E5-2620 (2.0GHz/6-core/15MB/95W) FIO Processor Kit | 662069-L21 |
|--|------------|

**NOTE:** The Intel Xeon E5-2600 v2 Processor Family can only be configured with the new 1866MHz HPE Smart Memory or the new 1600MHz Low Voltage (1.35v) HPE Smart Memory. The previously shipping Intel Xeon E5-2600 Processor Family cannot be configured with the new 1866MHz HPE Smart Memory or the new 1600MHz Low

## Configuration Information - Factory Integrated Models

Voltage (1.35v) HPE Smart Memory.

**NOTE:** The Intel Xeon E5-2620 processor does not support DIMMs at 1.35V. Using the HPE RBSU, 1.35V DIMMs can be changed to operate at 1.5V.

**NOTE:** DIMM slots 4 and 5 are not accessible when either the E5-2690, the E5-2643, the E5-2643 v2, or the E5-2637 v2, or the E5-2667 v2 is used. In a 2 processor configuration, there are twelve (12) total available DIMM slots.

**NOTE:** For the maximum supported memory speeds for each processor listed above, please reference the 'Memory Speed by Processor Model' table in the Memory section of the QuickSpecs.

**NOTE:** HT indicates that the processor model supports Intel® Hyper-Threading Technology.

**NOTE:** Turbo indicates the maximum potential frequency increment when using Intel® Turbo Boost Technology, with 8, 7, 6, 5, 4, 3, 2 or 1 core(s) active.

**NOTE:** DDR3 speed is the maximum memory speed of the processor. Actual memory speed may depend on the quantity and type of DIMMs installed.

**NOTE:** Up to 2 processors supported. Mixing different processor models is not supported.

**NOTE:** For the Intel® C600 Chipset E5-2600 Series, the letter preceding the model number indicates the Product Line (E3, E5, E7); 2600x, 2 = number of CPUs in a Node, 6 is socket/segment designation, 00 = Processor SKU, and x = L for low power SKUs.

**NOTE:** All processors within the server must be identical.

**NOTE:** All processors support Intel® Hyper-Threading and Intel® Turbo Boost Technologies except the E5-2603 and E5-2609.

**NOTE:** The letter "L" following the model number indicates denotes lower wattage.

**NOTE:** The processor model as well as the memory configuration determines the maximum speed memory can operate. Please see the see the "Memory" section later in this document.

**NOTE:** When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with any processors except the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2 all 16 DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs. When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with either the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2, all 12 available DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs.

**NOTE:** HPE ProLiant WS460c Gen8 shares same processor modules with BL460c Gen8 server. If two processors are desired, select one xxxxxx-L21 and one xxxxxx-B21.

**NOTE:** The WS460c Gen8 supports one or two processors.

**NOTE:** The WS460c Gen8 includes two I/O mezzanine expansion slots. A processor must be installed in processor slot 1 for access to the first mezzanine expansion slot (expansion slot 1). A processor must be installed in processor slot 2 for access to the second mezzanine expansion slot (expansion slot 2).

### HPE Memory

**NOTE:** HPE memory from previous generation servers are not qualified or warranted with this HPE ProLiant WS460c Server. HPE SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen8. For additional information, please see the HPE SmartMemory QuickSpecs at:

## Configuration Information - Factory Integrated Models

<https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04111165>

**NOTE:** LRDIMM, RDIMM and UDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support RDIMM, UDIMM and LRDIMM.

**NOTE:** A minimum of one DIMM is required per server.

**NOTE:** For additional memory rules and guidelines, see the "Memory" section later in this document.

**NOTE:** When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with any processors except the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2 all 16 DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs. When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with either the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2, all 12 available DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs.

**NOTE:** The internal USB 2.0 Port is not available when the HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits (700404-B21) are used.

### HPE SmartMemory

## Configuration Information - Factory Integrated Models

Kit

NOTE:NOTE: The HPE Q3000 Gen8 Mezz Graphics Kit (679855-B21) is installed in Mezz slot 2 and hence requires a two processor configuration which will provide a processor installed in the second CPU socket.

**NOTE:** All DDR3 memory option kits consist of one DIMM per kit. For detailed memory configuration rules and guidelines, please use the Online DDR3 Memory Configuration Tool: <http://www.hp.com/go/ddr3memory-configurator>.

**NOTE:** Kits described as LP include Low Power DIMMs. For more information on ProLiant Energy Efficient Features, see: <http://www.hp.com/go/proliant-energy-efficient>.

**NOTE:** Depending on the memory configuration and processor model the memory speed may run at 1333MHz, 1066MHz or 800MHz. Please see the Online Memory Configuration Tool for details: <http://www.hp.com/go/ddr3memory-configurator>

**NOTE:** For additional memory rules and guidelines, see the "Memory" section later in this document.

**NOTE:** For more information on ProLiant Energy Efficient Features, see: <http://www.hp.com/go/proliant-energy-efficient>

**NOTE:** PC3L is a low voltage memory.

### HPE Networking

#### FlexibleLOM Adapters

**NOTE:** The server requires one (1) FlexibleLOM that is installed in the FlexibleLOM connectors. All FlexibleLOMs are dual port: One port is routed to interconnect module bay 1 and the other to bay 2 of the enclosure.

#### 10Gb or 20Gb FlexibleLOM Adapters

|   |            |
|---|------------|
| HP Flex-10 10Gb 2-port 530FLB FIO Adapter     | 684211-B21 |
| HP FlexFabric 10Gb 2-port 554FLB FIO Adapter  | 684212-B21 |
| HP FlexFabric 10Gb 2-port 534FLB FIO Adapter  | 700742-B21 |
| HPE FlexFabric 20Gb 2-port 630FLB FIO Adapter | 700066-B21 |

**NOTE:** For use with Client OS such as Windows 7, directly presiding on system (i.e. "OS on bare-metal"), is supported only with the HPE Flex-10 10Gb 2-port 530FLB or HPE FlexFabric 10Gb 2-port 534FLB FlexibleLOM with basic network functions only. All other adapters are supported with use on supported server OS or hypervisor environment.

**NOTE:** FlexFabric supported only with server OS and/or in a virtualized environment using hypervisors.

**NOTE:** Please see the QuickSpecs for Technical Specifications and additional information: <http://www.hp.com/go/ProLiantNICs>

## Step 3: Choose Additional Factory Integration Options

### HPE Insight Software

HPE Insight Control including 1yr 24x7 Support ProLiant ML/DL/BL-bundle Single Server FIO LTU C6N36A

|                             | <p><b>NOTE:</b> This part number includes one HPE MultiGPU Carrier Card with three Quadro K3100M graphics loaded. Required to use in two carrier cards configuration (Total of six Quadro K3100M).</p> |            |
|                             | <p><b>NOTE:</b> Requires Expansion Blade Slot2 Enablement FIO Kit (PN 721120-B21).</p>   |            |
|                             | <p><b>NOTE:</b> Available only with Intel® Xeon® E5-2600 v2 series processor configuration</p>   |            |
|                             | HP Gen8 Expansion Blade Slot 2 FIO Enablement Kit  | 721120-B21 |
|                             | <p><b>NOTE:</b> This optional kit is available at time of initial system purchase only. This kit is required when supporting two HPE MultiGPU Carrier cards or two NVIDIA Quadro K4000 graphics.</p>   |            |

### Step 4: Choose Additional Options for Factory Integration

**NOTE:** For additional options, please refer to the "Core Options" and "Additional Options" section below. For additional options, including server blade enclosures interconnect and mezzanine options and power subsystem options; please see the Core Options and Additional sections below; or the following:

HPE BladeSystem c3000 Enclosure QuickSpecs:

<https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04128340>

**NOTE:** The c3000 HPE c-Class enclosures have full backwards and forwards compatibility, existing server blades are

## Configuration Information - Factory Integrated Models

supported in the new enclosures and any future server blades will be supported in the existing enclosures.

HPE BladeSystem c7000 Enclosure QuickSpecs:

<https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04128339>

**NOTE:** The c7000 HPE c-Class enclosures have full backwards and forwards compatibility, existing server blades are supported in the new enclosures and any future server blades will be supported in the existing enclosures.

**NOTE:** For optimal cooling and system performance the WS460c Gen8 requires the c7000 enclosure to be configured with 10 fans and the c3000 enclosure to be configured with 6 fans.

HPE BladeSystem c-Class Interconnect and Mezzanine Components:

<http://h18004.www1.hp.com/products/blades/components/c-class-interconnects.html>

<http://h18004.www1.hp.com/products/blades/components/c-class-adapters.html>.

## Core Options

**NOTE:** Some options may not be integrated at the factory. To ensure only valid configurations are ordered, Hewlett Packard Enterprise recommends the use of an Hewlett Packard Enterprise approved configurator. Contact your local sales representative for additional information.

**NOTE:** For additional options, please refer to the "Core Options" and "Additional Options" sections below.

### HPE Networking

**NOTE:** Each 10 Gigabit Ethernet adapter requires a minimum of 2GB of server memory.

**NOTE:** A 10 Gigabit Ethernet adapter supports linking at 1Gbps or 10Gbps when connected to an interconnect module with 10Gb Ethernet downlinks.

**NOTE:** A 10 Gigabit Ethernet adapter supports linking at only 1Gbps when connected to an interconnect module with 1Gb Ethernet downlinks.

**NOTE:** The 10 Gigabit Ethernet adapters on each server blade connect to a 10Gb interconnect in bays 3-6 (HPE BladeSystem c7000 Enclosure) or bays 2-4 (HPE BladeSystem c3000 Enclosure).

### FlexibleLOM Adapters

**NOTE:** The server supports one (1) FlexibleLOM that is installed in the FlexibleLOM connectors and is already included in the pre-configured models. However, it must be added in Step 2 for Configure-to-Order Models. The FlexibleLOM options below are used to change these original FlexibleLOMs.

#### 10 or 20 Gigabit Ethernet FlexibleLOM

HPE Flex-10 10Gb 2-port 530FLB Adapter

656590-B21

NOTE:NOTE: Please see QuickSpecs for technical specifications and additional information at <https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04111539>.

NOTE:NOTE: Client OS on bare metal is supported only with this BLOM.

HP FlexFabric 10Gb 2-port 534FLB Adapter

700741-B21

**NOTE:** Please see QuickSpecs for technical specifications and additional information at: <https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04111370>

HPE FlexFabric 10Gb 2-port 554FLB Adapter

647586-B21

NOTE:NOTE: Please see QuickSpecs for technical specifications and additional information at: <https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04111537>

HPE FlexFabric 20Gb 2-port 630FLB Adapter

700065-B21

### HPE InfiniBand Mezzanine Adapters

**NOTE:** InfiniBand mezzanine HCAs are supported on the HPE ProLiant WS460c Gen8 with server OS or hypervisors. Windows client OS (Windows 7) not supported.

**NOTE:** When an InfiniBand adapter is installed in mezzanine slot 1, only one port is active (regardless of operating mode). When installed in any other mezzanine slot, both ports are active.

HP InfiniBand QDR/EN 10Gb Dual Port 544M Adapter

644160-B21

NOTE:NOTE: The QDR InfiniBand adapter may be installed in upper mezzanine slot of the WS460c when vacant

HP InfiniBand FDR/EN 10/40Gb Dual Port 544M Adapter

644161-B22

NOTE:NOTE: The FDR InfiniBand adapter may be installed in upper mezzanine slot of the WS460c when vacant

## Core Options

HPE InfiniBand FDR 2-port 545M Adapter 702213-B21  
NOTE:NOTE: InfiniBand QDR and FDR speeds are only supported on the HPE BladeSystem c7000 Enclosure. For additional information, please see the HPE BladeSystem c7000 Enclosure and InfiniBand QuickSpecs at:  
<https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04126044>  
<https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04154440>

---

**HPE Fibre Channel** **NOTE:** All Fibre Channel mezzanine HBAs are supported on the HPE ProLiant WS460c Gen8 with server OS or hypervisors only. Windows client OS (Windows 7) on bare-metal not supported.

HPE LPe1605 16Gb Fibre Channel Host Bus Adapter for BladeSystem c-Class 718203-B21

**NOTE:** Please see QuickSpecs for technical specifications and additional information at <https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04315132>

HPE LPe1205A 8Gb Fibre Channel Host Bus Adapter for BladeSystem c-Class 659818-B21

**NOTE:** Please see QuickSpecs for technical specifications and additional information at <https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04163733>

HPE QMH2672 16Gb Fibre Channel Host Bus Adapter 710608-B21

**NOTE:** Please see QuickSpecs for technical specifications and additional information at [http://h18000.www1.hp.com/products/QuickSpecs/14622\\_div/14622\\_div.html](http://h18000.www1.hp.com/products/QuickSpecs/14622_div/14622_div.html)

HPE QMH2572 8Gb Fibre Channel Host Bus Adapter 651281-B21

**NOTE:** Please see QuickSpecs for technical specifications and additional information at <https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04126962>

---

| HP BL460c Gen8 Intel Xeon E5-2603 (1.8GHz/4-core/10MB/80W) Processor Kit  | 667805-B21 |

## Core Options

**NOTE:** The WS460c Gen8 supports one or two processors.

**NOTE:** The WS460c Gen8 includes two I/O mezzanine expansion slots. A processor must be installed in processor slot 1 for access to the first mezzanine expansion slot (expansion slot 1). A processor must be installed in processor slot 2 for access to the second mezzanine expansion slot (expansion slot 2).

**NOTE:** All processors within the server must be identical.

**NOTE:** The letter "L" preceding the model number indicates denotes lower wattage.

**NOTE:** The processor model as well as the memory configuration determines the maximum speed memory can operate. Please see the see the "Memory" section later in this document

**NOTE:** The Intel Xeon E5-2620 processor does not support DIMMs at 1.35V. Using the HPE RBSU, 1.35V DIMMs can be changed to operate at 1.5V.

**NOTE:** The Intel Xeon E5-2600 v2 Processor Family can only be configured with the new 1866MHz HPE Smart Memory or the new 1600MHz Low Voltage (1.35v) HPE Smart Memory. The previously shipping Intel Xeon E5-2600 Processor Family cannot be configured with the new 1866MHz HPE Smart Memory or the new 1600MHz Low Voltage (1.35v) HPE Smart Memory.

**NOTE:** DIMM slots 4 and 5 are not accessible when either the E5-2690, the E5-2643, the E5-2643 v2, or the E5-2637 v2, or the E5-2667 v2 is used. In a 2 processor configuration, there are twelve (12) total available DIMM slots.

**NOTE:** For the maximum supported memory speeds for each processor listed above, please reference the 'Memory Speed by Processor Model' table in the Memory section of the QuickSpecs.

**NOTE:** HT indicates that the processor model supports Intel® Hyper-Threading Technology.

**NOTE:** Turbo indicates the maximum potential frequency increment when using Intel® Turbo Boost Technology, with 8, 7, 6, 5, 4, 3, 2 or 1 core(s) active.

**NOTE:** DDR3 speed is the maximum memory speed of the processor. Actual memory speed may depend on the quantity and type of DIMMs installed.

**NOTE:** Up to 2 processors supported. Mixing different processor models is not supported.

**NOTE:** For the Intel® C600 Chipset E5-2600 Series, the letter preceding the model number indicates the Product Line (E3, E5, E7); 2600x, 2 = number of CPUs in a Node, 6 is socket/segment designation, 00 = Processor SKU, and x = L for low power SKUs.

**NOTE:** All processors support Intel® Hyper-Threading and Intel® Turbo Boost Technologies except the E5-2603 and E5-2609.

**NOTE:** When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with any processors except the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2 all 16 DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs.

When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with either the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2, all 12 available DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs.

---

## HPE Memory

**NOTE:** HPE memory from previous generation servers are not qualified or warranted with this HPE ProLiant WS460c Server. HPE SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this

## Core Options

document for Gen8. For additional information, please see the HPE SmartMemory QuickSpecs at:

<https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04111165>

**NOTE:** LRDIMM, RDIMM and UDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support RDIMM, UDIMM and LRDIMM.

**NOTE:** A minimum of one DIMM is required per server.

**NOTE:** For additional memory rules and guidelines, see the "Memory" section later in this document.

**NOTE:** When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with any processors except the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2 all 16 DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs. When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with either the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2, all 12 available DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs.

**NOTE:** The internal USB 2.0 Port is not available when the HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits (700404-B21) are used.

## Core Options

### Load Reduced DIMMs (LRDIMMs) - E5-2600 v2 series Processors

HP 32GB (1x32GB) Quad Rank x4 PC3-14900L (DDR3-1866) Load Reduced CAS-13 Memory Kit 708643-B21

### Load Reduced DIMMs (LRDIMMs) - E5-2600 series Processors

HP 32GB (1x32GB) Quad Rank x4 PC3L-10600 (DDR3-1333) LRDIMM CAS-9 LP Memory Kit 647903-B21

NOTE:NOTE: The HPE Q3000 Gen8 Mezz Graphics Kit (679855-B21) is installed in Mezz slot 2 and hence requires a two processor configuration which will provide a processor installed in the second CPU socket.

**NOTE:** All DDR3 memory option kits consist of one DIMM per kit. For detailed memory configuration rules and guidelines, please use the Online DDR3 Memory Configuration Tool: <http://www.hp.com/go/ddr3memory-configurator>.

**NOTE:** Kits described as LP include Low Power DIMMs. For more information on ProLiant Energy Efficient Features, see: <http://www.hp.com/go/proliant-energy-efficient>.

**NOTE:** Depending on the memory configuration and processor model the memory speed may run at 1333MHz, 1066MHz or 800MHz. Please see the Online Memory Configuration Tool for details: [www.hp.com/go/ddr3memory-configurator](http://www.hp.com/go/ddr3memory-configurator)

**NOTE:** For additional memory rules and guidelines, see the "Memory" section later in this document.

**NOTE:** For more information on ProLiant Energy Efficient Features, see: <http://www.hp.com/go/proliant-energy-efficient>

**NOTE:** PC3L is a low voltage memory.

---

## HPE Hard Drives

**NOTE:** The ProLiant WS460c Gen8 server includes the new HPE hot-plug small form factor (SFF) SmartDrive carrier for enhanced management and reduced maintenance errors. HPE drives from previous generation servers are not compatible with the WS460c Gen8 drive bays.

**NOTE:** The mixing of standard SAS drives with SAS SSD is supported within the server, but limits the RAID configuration to two separate RAID 0 volumes. Mixing of other drives types is not supported.

**NOTE:** HPE hard drives have either a one year or three year warranty; refer to the specific hard drive QuickSpecs for details.

**NOTE:** The hard drive options are not required when configuring a drive-less model.

### SATA Hot Plug SFF (2.5-inch) Midline (MDL) Drives

HP 1TB SATA 6G Midline 7.2K SFF (2.5in) SC 1yr Wty Digitally Signed Firmware HDD 655710-B21

HP 500GB 6G SATA 7.2K rpm SFF (2.5-inch) SC Midline 1yr Warranty Hard Drive 655708-B21

NOTE:NOTE: Please see QuickSpecs for Technical Specifications and additional information: <https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04111725>

| <b>NOTE:</b> Required when using NVIDIA GRID K2 GPU (PN 729851-B21) or Tesla K20 or K20X. |            |

## Additional Options

**NOTE:** For additional options, please refer to the "Core Options" and "Additional Options" sections below.

**NOTE:** Some options may not be integrated at the factory. To ensure only valid configurations are ordered, Hewlett Packard Enterprise recommends the use of an Hewlett Packard Enterprise approved configurator. Contact your local sales representative for additional information.

### HPE Insight software

#### HPE Insight Control

HPE Insight Control including 1yr 24x7 Technical Support and Updates 1-server LTU C6N27A

HPE Insight Control including 1yr 24x7 TSU E-LTU C6N28ABE

HP Insight Control Server Provisioning Media Kit BD883A

HPE Insight Management Media Kit C6N31A

**NOTE:** HPE Insight Management Media Kit contains DVDs without licenses. Contains HPE Systems Insight Manager, HPE Insight Control, HPE Matrix Operating Environment, and Virtual Connect Enterprise Manager software. Uses an integrated installer to perform quick and accurate software installation and updates.

**NOTE:** Electronic and Flexible-Quantity licenses can be used to purchase multiple licenses with a single activation key.

**NOTE:** Customer will receive a license entitlement certificate, which must be redeemed online or via fax in order to obtain the license activation key(s). Includes one year of 24 x 7 HPE Software Technical Support Service.

**NOTE:** Licenses ship without media. The HPE Insight Management Media Kit can be ordered separately, or can be downloaded at <http://www.hp.com/go/insightupdates>.

**NOTE:** For additional license kits, please see the QuickSpecs at: <https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04123391>

### HPE iLO Advanced Licenses

HPE iLO Advanced for BladeSystem including 3yr 24x7 Tech Support and Updates 1-server LTU BD502A

| <b>HPE Security</b> | HPE Trusted Platform Module Option | 488069-B21 |
|---------------------|------------------------------------|------------|

**NOTE:** The TPM (Trusted Platform Module) is a microcontroller chip that can securely store artifacts used to authenticate the server platform. These artifacts can include passwords, certificates and encryption keys. Windows® BitLocker™ Drive Encryption (BitLocker) is a data protection feature available in Windows Server® 2008. BitLocker leverages the enhanced security capabilities of a Trusted Platform Module (TPM)

## Additional Options

version 1.2. The TPM works with BitLocker to help protect user data and to ensure that a server running Windows Server 2008 has not been tampered with while the system was offline.

**NOTE:** For more information about TPM, including a white paper, go to <http://www.hp.com/go/TPM>.

**NOTE:** ProLiant OS pre-installed units will come with the partition required for TPM deployment.

**NOTE:** The TPM key is unique to every TPM deployed server and must be retained. Misplacing or losing the key could result in data loss.

## Memory

For detailed memory configuration rules and guidelines, please use the Online DDR3 Memory Configuration Tool:

<http://www.hp.com/go/ddr3memory-configurator>

### Memory Subsystem Architecture

Each Intel® Xeon® E5-2600 family processor socket contains four memory channels that support two DIMMs each for a total of eight (8) DIMM per installed processor or a grand total of sixteen (16) DIMMs for the server. Up to 32GB capacity DIMMs are supported for 512GB of memory (16 DIMM slots x 32GB per DIMM).

### Memory Population Rules and Guidelines:

- A minimum of one DIMM is required per processor.
- Install DIMMs only if the corresponding processor is installed.
- If only one processor is installed in a two processor system, only half of the DIMM slots are available.
- DIMM sizes can be mixed in channel. To maximize performance, it is recommended to balance the total memory capacity between all installed processors and to load the channels similarly whenever possible.
- RDIMMs operating at either 1.35V or 1.5V may be mixed in any order, but the system will power them at the higher voltage.
- LRDIMM, RDIMM and UDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support RDIMM, UDIMM and LRDIMM.
- The Intel Xeon E5-2620 processor does not support DIMMs at 1.35V.
- DIMMs of different speeds may be mixed in any order; the server will select a common optimal speed.
- The maximum memory speed is a function of the memory type, memory configuration, and processor model.
- The maximum memory capacity is a function of the memory type and number of installed processors.
- HPE memory from previous generation servers is not compatible with the WS460c Gen8 Server Blade.
- To realize the performance memory capabilities listed in this document, HPE SmartMemory is required. For additional information, please see the HPE SmartMemory QuickSpecs at: <https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04111165>.
- For memory population rules and additional memory guidelines, please see the WS460c Gen8 user guide at <http://www.hp.com/support>.

**NOTE:** Memory configurations listed do not apply to "Factory Integrated Models".

| *** Using HPE SmartMemory, UDIMMs at 2DPC are supported up to 1333MHz. Third party UDIMMs at 2DPC may only support up to 1066MHz.  |   |      |                       |      |      |      |      |         |      |      |
| <b>NOTE:</b> Maximum memory speed is a function of the processor QPI bus speed; see the table below "Memory Speed by Processor Model".   |   |      |                       |      |      |      |      |         |      |      |
| <b>NOTE:</b> When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with any processors except the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2 all 16 DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs. When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with either the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2, all 12 available DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs. |   |      |                       |      |      |      |      |         |      |      |
| <b>NOTE:</b> The internal USB 2.0 Port is not available when the HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits (700404-B21) are used.   |   |      |                       |      |      |      |      |         |      |      |

Memory Speed by Processor Model

| Processor Model   | Supported Memory Speeds |
|---|-------------------------|
| E5-2680, E5-2670, E5-2667, E5-2665, E5-2660, E5-2650, E5-2650L, E5-2637 | 1600/1333/1066MHz       |
| E5-2640, E5-2630, E5-2630L, E5-2620                                     | 1333/1066MHz            |
| E5-2609, E5-2603  | 1066MHz                 |

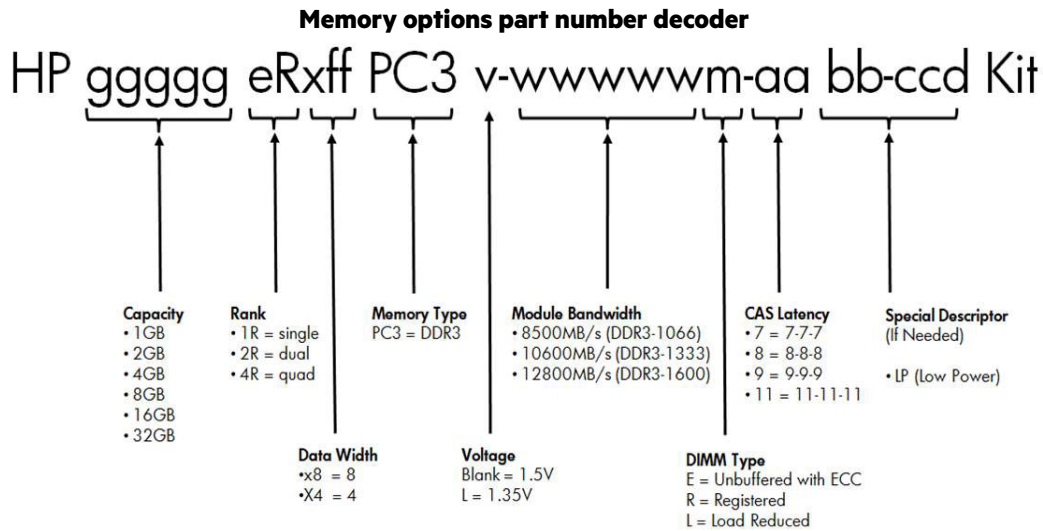

## Memory

### Standard and Maximum Memory Capacity (Pre-configured Models)

| Pre-Configured Models | Standard Memory  | Maximum Memory Plus Optional Memory | Standard Memory Replaced with Optional Memory |
|-----------------------|------------------|-------------------------------------|---|
| Intel Xeon E5-2637    | 32GB<br>(8x 4GB) | 160GB<br>(8x 4GB + 8x 16GB)         | 512GB<br>(16x 32GB)                           |

**NOTE:** Capacity references are rounded to the common gigabyte (GB) values.

- 2GB = 2,048MB
- 4GB = 4,096MB
- 8GB = 8,192MB
- 16GB = 16,384MB
- 32GB = 32,768MB

Following are memory options available from Hewlett Packard Enterprise:

### HPE Memory

**NOTE:** HPE memory from previous generation servers are not qualified or warranted with this HPE ProLiant WS460c Server. HPE SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen8. For additional information, please see the HPE SmartMemory QuickSpecs at:

<https://www.hpe.com/h20195/v2/GetHTML.aspx?docname=c04111165>

**NOTE:** LRDIMM, RDIMM and UDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support RDIMM, UDIMM and LRDIMM.

**NOTE:** A minimum of one DIMM is required per server.

**NOTE:** For additional memory rules and guidelines, see the "Memory" section later in this document.

**NOTE:** When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits are used with any processors except the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2 all 16 DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs. When HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333)

## Memory

Registered CAS-9 Low Voltage FIO Memory Kits are used with either the E5-2690, the E5-2643, the E5-2637 v2, the E5-2643 v2, or the E5-2667 v2, all 12 available DIMM slots on the WS460c Gen8 must be fully populated with these 24GB DIMMs.

**NOTE:** The internal USB 2.0 Port is not available when the HPE 24GB (1x24GB) Three Rank x4 PC3L-10600R (DDR3-1333) Registered CAS-9 Low Voltage FIO Memory Kits (700404-B21) are used.

### HPE SmartMemory

#### Registered DIMMs (RDIMMs) - E5-2xxx v2 series Processors

**NOTE:** All DDR3 memory option kits consist of one DIMM per kit. For detailed

## Memory

memory configuration rules and guidelines, please use the Online DDR3 Memory Configuration Tool: <http://www.hp.com/go/ddr3memory-configurator>.

**NOTE:** Kits described as LP include Low Power DIMMs. For more information on ProLiant Energy Efficient Features, see: <http://www.hp.com/go/proliant-energy-efficient>.

**NOTE:** Depending on the memory configuration and processor model the memory speed may run at 1333MHz, 1066MHz or 800MHz. Please see the Online Memory Configuration Tool for details: <http://www.hp.com/go/ddr3memory-configurator>

**NOTE:** For additional memory rules and guidelines, see the "Memory" section later in this document.

**NOTE:** For more information on ProLiant Energy Efficient Features, see: <http://www.hp.com/go/proliant-energy-efficient>

**NOTE:** PC3L is a low voltage memory.

## Storage

1-2 2 x SFF hot-plug SAS, SATA, SAS SDD, and SATA SSD hard drives

---

### Maximum Internal Storage Capacity

|                       |       |                  |
|-----------------------|-------|------------------|
| Hot Plug SFF SAS      | 2.4TB | 2 x 1.2TB drives |
| Hot Plug SFF SATA     | 2.0TB | 2 x 1.0TB drives |
| Hot Plug SFF SAS SSD  | 1.6TB | 2 x 800GB drives |
| Hot Plug SFF SATA SSD | 1.6TB | 2x800GB drives   |

---

### Additional Third Party Option

#### Teradici PCoIP® Hardware Accelerator

Teradici PCoIP® Hardware Accelerator (APEX 2800) for HPE ProLiant Gen 8 Server Blades

**NOTE:** This is a third party product marketed, sold and supported by the solution's vendor. For more information, check vendor's website at: <http://www.teradici.com/hardware-accelerator>

**NOTE:** This solution must be purchased separately and is available from solution vendor's authorized resellers. Hewlett Packard Enterprise does not resell or factory integrate the solution

**NOTE:** This solution is supported by the vendor on servers:

- HPE ProLiant BL460c Gen8 Server Blade
- HPE ProLiant WS460c Gen8 Graphics Expansion Blade

**NOTE:** Teradici, PCoIP and PC-over-IP are trademarks of Teradici Corporation and may be registered in the United States and/or other countries.

### Environment- friendly Products and Approach

### End-of-life Management and Recycling

Hewlett Packard Enterprise offers end-of-life Hewlett Packard Enterprise product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to:  
<https://promotions.ext.hpe.com/WMCF.Web/us/en/page/GlobalLandingPage/>.  
To recycle your product, please go to:  
<https://promotions.ext.hpe.com/WMCF.Web/us/en/page/GlobalLandingPage/>  
or contact your nearest Hewlett Packard Enterprise sales office. Products returned to Hewlett Packard Enterprise will be recycled, recovered or disposed of in a responsible manner.  
The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard Enterprise web site at:  
<https://promotions.ext.hpe.com/WMCF.Web/us/en/page/GlobalLandingPage/>.  
These instructions may be used by recyclers and other WEEE treatment facilities as well as Hewlett Packard Enterprise OEM customers who integrate and re-sell Hewlett Packard Enterprise equipment.

## Summary of Changes

| Date        | Version History       | Action  | Description of Change  |
|-------------|-----------------------|---------|--|
| 23-Oct-2016 | From Version 31 to 32 | Changed | Care Pack naming and Service and Support- Parts and Materials updated.   |
| 16-Feb-2016 | From Version 30 to 31 | Changed | Information was updated in different sections  |
|             |                       | Added   | SKU added in Core Options section:<br>832514-B21   |
|             |                       | Removed | Obsolete SKU deleted:<br>789135-B21,   |
| 01-Dec-2015 | From Version 29 to 30 | Changed | Configuration Information - Factory Integrated Models, Core Options, Additional Options, and Memory sections were updated.   |
|             |                       | Added:  | SKUs added in Core Options section:<br>816576-B21, 816572-B21, 816568-B21, 816562-B21, 822567-B21, 822563-B21, 822559-B21, 822555-B21, 816929-B21, 816919-B21, 816909-B21, 816899-B21, 816889-B21, 816879-B21, 817011-B21, 816995-B21, 816985-B21, 816975-B21, 816965-B21. |
|             |                       | Removed | Obsolete SKUs were deleted:<br>662064-L21, 662065-L21, 735062-B21, 735062-B21, 789155-B21, C7S14A, E5Y38A, E5Y39AAE, D8S85AAE, D8S84A, AP880A.   |
| 28-Sep-2015 | From Version 28 to 29 | Changed | Core Options and Additional Options sections were updated.   |
|             |                       | Added   | SKUs added:<br>P8B24A, P8B26AAE, P8B31A  |
|             |                       | Removed | Obsolete SKUs were deleted:<br>F6Q89AAE, 741155-B21  |
| 17-Aug-2015 | From Version 27 to 28 | Added   | SKUs added in Additional Options and Core Options sections:<br>C9A82AAE, 804677-B21, 804671-B21, 804665-B21, 804639-B21, 804631-B21, 804625-B21, 832414-B21, 804613-B21, 804605-B21, 804599-B21, 804593-B21, 804587-B21, 804581-B21, 804575-B21                            |
|             |                       | Removed | Obsolete SKUs were deleted:<br>AQ697B, U6W98E  |
| 01-Jun-2015 | From Version 26 to 27 | Changed | Information updated in Additional options section.   |
|             |                       | Added   | SKUs were added in Core Options section:<br>748387-B21, 791034-B21   |
|             |                       | Removed | Obsolete SKUs were removed in Core Options section:<br>662076-L21, 667803-L21, 662072-L21, 662068-L21, 667805-L21, 662063-L21, 662066-L21, 662067-L21, 662079-L21, 741151-B21, 667804-L21, 662078-L21, 662077-L21, 662070-L21, 741159-B21.                                 |
| 30-Mar-2015 | From Version 25 to 26 | Changed | Standard Features, Configuration Information-Factory Integrated Models and Models sections were updated  |
|             |                       | Added   | SKUs Added:<br>765464-B21, 765466-B21, 765453-B21, 765455-B21, 789135-B21, 789145-B21, 789155-B21, 781518-B21, 785069-B21, 781516-B21, 785067-B21, 802578-B21, 802582-B21, 802586-B21, 802891-B21  |
|             |                       | Removed | Obsolete SKUs were removed:<br>741146-B21, 741138-B21, 741142-B21  |
| 09-Feb-2015 | From Version 24 to 25 | Changed | Optional Features, Service and Support and Core Options sections were updated.   |
|             |                       | Added   | SKUs were added on HPE Hard Drives:<br>779164-B21, 779168-B21, 779172-B21, 779176-B21, 764923-B21, 764925-B21, 764927-B21, 764929-B21.   |
| 01-Dec-2014 | From Version 23 to 24 | Changed | Core Options and Additional Options sections were updated. Name changed from HPE ProLiant WS460c Gen8 Workstation Blade to HPE ProLiant WS460c Gen8 Graphics Server Blade  |
|             |                       | Added   | SKU was added on Hard Drives:  |
