## HP ProLiant DL580 G2 Storage Server

### Overview

#### Introduction

The HP ProLiant DL580 G2 Storage Server is the ultimate in NAS performance, scalability and availability by providing a gateway to the enterprise SAN for file level data. The ProLiant DL580 G2 Storage Server provides the maximum return on data center storage investment and the confidence that is expected in an enterprise environment is built in. The ProLiant DL580 G2 Storage Server connects to the industry's broadest range of SAN arrays - the fusion of NAS and SAN for the enterprise.

The HP ProLiant DL580 G2 Storage Server models are available with several supported storage arrays including: EVA5000, EVA3000, XP, EMA, MA, VA, MSA1000 and MSA1500 cs.

#### What's New

- The HP ProLiant DL580 G2 Storage Server was previously known as the HP StorageWorks NAS 9000s. As of November 2004, HP re-branded all of its HP StorageWorks NAS products to the new brand name of HP ProLiant Storage Server. Other than the name, there is no difference between an HP ProLiant DL580 G2 Storage Server and an HP StorageWorks NAS 9000s.

**What is a Storage Server?** HP uses the Storage Server product name to describe its Network Attached Storage (NAS) solutions. NAS solutions are specialized file-serving devices that provide support for heterogeneous files in a high-capacity package. NAS solutions also provide specific features to simplify the tasks and reduce the resources associated with data storage and management. The objective of NAS technology is to simplify manageability and improve data access to clients and applications. A NAS solution will generally provide network accessible storage to a mix of clients and servers running different operating systems.

#### Benefits of the HP ProLiant DL580 Storage Server

##### Controllable

- **NAS/SAN fusion:** integration of file or block data leads to increased efficiency of the storage network.
- **Manageable:** simpler management of file or block level data leading to decreased costs for storage.
- **Affordable:** NAS/SAN fusion provides an architecture that offers better efficiency for your storage.

##### Resilient

- **Reliable:** HP's experience is the key to success with affordable optimized NAS solutions.
- **Redundant:** configurations that allow for redundancy at every level.

##### Extensible

- **Extensive:** low-end, remote/workgroup solutions, to consolidated fusion solutions for the enterprise.
- **Optimized:** HP provides the right NAS solution for each customer, no need to settle for trade-offs.

##### Management & Consolidation

- StorageWorks NAS provides increased manageability of file services by allowing file server and storage consolidation. The integrated web GUI provides a single point of manageability for administrative function associated with advanced file serving.

##### Scalability

- While consolidating servers and storage the StorageWorks NAS products provides scalability up to the limits of the SAN that maximizes the return on storage investment.

##### Availability

- StorageWorks NAS provides a family of products that offer a wide range of availability, and confidence that data will available when needed. From redundant components, to replication, to no single point of failure deployments, StorageWorks NAS offers it all.

##### Performance

- Advanced file serving functions require high performance. The StorageWorks NAS family of products offers impressive performance ranging from the smallest business to the largest enterprise.

### Software Components

#### Included Software

- **HP StorageWorks Secure Path** - Secure Path is multi-path, high availability software that manages and maintains continuous data access to HP storage systems, enabling no-single-point-of-failure from server to storage. Secure Path is host-resident software that monitors the data paths between server and storage to increase availability of information. In the event that a path failure is detected, Secure Path fails over to an alternative path. When that path becomes available, Secure Path can automatically failback to the original path. Included with the HP ProLiant DL580 G2 Storage Server. <http://h18006.www1.hp.com/products/sanworks/secure-path/index.html>

#### Optional Software

- **HP Insight Manager** - The ProLiant DL580 G2 Storage Server supports Insight Manager through SNMP. For more information on HP Insight Manager: <http://h18013.www1.hp.com/products/servers/management/hpsim/index.html>
- **HP OpenView Management tools** - The ProLiant DL580 G2 Storage Server supports Open View through SNMP. For more information HP OpenView: <http://www.managementsoftware.hp.com/>
- **HP OpenView Storage Data Protector** - The HP OpenView Storage Data Protector software is enterprise data protection and disaster recovery, ensuring recovery from any disruption. Data Protector integrates a variety of techniques to eliminate backup and recovery windows. The capabilities to eliminate planned downtime range from online backup and backup of open files to zero-downtime, zero-impact backup. The software provides industry-leading instant recovery as well as several disaster recovery alternatives to eliminate unplanned downtime, allowing recovery of entire data centers in minutes.

Data Protector is enabling organizations to reduce costs by automating routine tasks to maximize the effectiveness of the data protection staff. For the price of an entry-level product, it provides the enterprise functionality customers need. Data Protector scales from single server to distributed enterprise, covering an extensive range of heterogeneous applications, operating environments and storage configurations with a single solution.

The ProLiant DL580 G2 Storage Server supports using Data Protector as the backup software solution. For more information on HP OpenView Data Storage Protector:

<http://h18006.www1.hp.com/products/storage/software/dataprotector/index.html>

- **HP OpenView Storage Mirroring** - The ProLiant DL580 G2 Storage Server supports using Storage Mirroring as the replication software solution (see Options section for more details)

## HP ProLiant DL580 G2 Storage Server

### Service and Support, HP Care Pack, and Warranty Information

#### Warranty

The HP ProLiant DL580 G2 Storage Server comes with a 3-3-3 warranty (3 years parts exchange, 3 years labor, and 3 years on-site, next business day response)

#### Warranty Upgrade Options

- Response – Upgrade on-site response from next business day to same day 4-hours
- Coverage – Extend hours of coverage from 5 days x 9 hours to 7 days x 24 hours
- Duration – Select duration of coverage for a minimum period of 1 year or multiple years

HP offers a portfolio of services ranging from Storage Design and Architecture that provides a complete multi-site design and implementation, to various levels of on-going maintenance support. Additionally the basic warranty service can be enhanced and/or HP Installation services can be purchased. Specifically HP Care Pack services include:

- Proactive 24 (P24)
- Support Plus 24 for Storage
- Support Plus for Storage
- 4-Hour, 24x7 Onsite, HW Support
- 4-Hour, 13x5 Onsite, HW Support
- Next Business Day Onsite, HW Support
- Installation for Storage (per event)
- Installation & Startup for Storage (per event)

#### Software Product Services

- HP warrants only that the Software media will be free of physical defects for a period of 90 days from delivery.
- Upgrades to the 90 day media defect warranty are available as HP Care Pack services. These services are available to upgrade the warranty to (1 or 3) full year of 9 hours by 5 days (or 24x7) software advisory and remedial software telephone support, new version license rights, and media and documentation distribution service.

### Service and Support, HP Care Pack, and Warranty Information

- Hardware Product Services**
- Installation services
  - On-site maintenance (includes warranty support)
  - Response time upgrades during the warranty period
  - Post-warranty coverage
  - RAID setup and performance consulting via statement of work
  - Migration service consulting via statement of work

For additional hardware installation and maintenance information, please refer to the URLs listed below:

Our Proactive 24 annuity service (with the SAN Module) allows continuous SAN/NAS growth by ensuring that your entire SAN/NAS is safely kept updated with analysis and recommendations on relevant, ongoing firmware (FW) changes and it ensures rapid resolution of complex SAN/NAS issues. Our SAN Solution Service is a one-time review of your entire SAN/NAS and all the components (applications, HBAs, switches and FW, arrays etc) to ensure that all components are at tested, HP Certified levels. The HP SAN Design/Architecture Service provides as broad and as deep a review and recommendation as needed of how your SAN/NAS environment can be designed and implemented to meet your business storage needs.

The on-going support offerings include various response times (4 hour same day, next day, etc) as well as coverage periods (Monday – Friday, 24x7, 1 yr, 3 yr, etc). These services are available for both hardware and software to ensure all customer support needs are met and can be purchased from either value or volume channels.

Finally HP offers an optional migration service to assist the customer in moving to the newest product release. This may be in the form of a defined kit and service, or may alternatively be performed on a time & material basis.

HP Services allows the customer to leverage HP's experience in selecting and configuring the most widely used security features, and provides an environment that is immediately more available due to increased change control and significantly improved data security.

For more information on these and other service options, please contact any of our worldwide sales offices or visit our Web site at: <http://www.hp.com/hps/support>.

#### Installation and Startup Services

The Installation and Startup Service package provides installation and configuration of HP StorageWorks products. Major categories of work could include:

- Pre-installation consulting and planning
- Hardware installation, configuration and verification
- RAID array configuration and initialization
- Installation, configuration and verification of StorageWorks software
- Service tools installed, configured and verified
- Customer orientation

---

#### Storage Service Packages

The Storage Services Packaging takes the existing storage product along with the existing services and creates a package of the storage hardware and appropriate services. The increased level of support provides for a higher level of storage system availability for the customer. The package includes 24x7 support with a 4-hour response for 3 years as well as installation and startup service.

### Product Configuration Wizard

In the following steps you will be guided through a series of steps to help you configure a customized model.

#### Step 1 – Order model

<b>HP ProLiant DL580 G2 Storage Server</b> 348937-B22 (WW)	<b>Processor(s)</b>	(2) Intel Xeon Processor 2.8 GHz standard (up to 4 supported)
	<b>Cache Memory</b>	2-MB Integrated Level 3 Cache
	<b>Memory</b>	4 GB Memory 200-MHz Double Data Rate (DDR) SDRAM (PC1600 Registered SDRAM Memory with Advanced ECC functionality)
	<b>Network Controller</b>	HP NC7170 Dual Port PCI-X 1000T Gigabit Server Adapter (in a slot)
	<b>Storage Controller</b>	Smart Array 5i Plus Controller (Dual Channel, Ultra3) with Battery-Backed Write Cache Enabler (integrated on system board)
	<b>Manageability</b>	Integrated Lights-Out (iLO) Standard management (integrated on system board) (Advance License included)
	<b>Hard Drive (internal storage)</b>	Standard two 36.4-GB 10,000 rpm U320 Universal Hard Drives (1") (for mirrored OS internal to server) <b>NOTE:</b> Maximum of two hard drives are supported. Hard drives are for user data and are based on the SAN chosen.
	<b>External Storage</b>	Supports attachment to XP, EVA, MSA, VA and MSA1000/1500 in a SAN
	<b>Multi-Path software</b>	HP StorageWorks Secure Path included with this model.
	<b>Cooling Fans</b>	7 Hot Plug Redundant Fans (individually removable)
	<b>Power Supplies</b>	2 x 800-Watt Hot Plug Power Supplies
	<b>Diskette Drive</b>	1.44 MB Diskette Drive (slim line)
	<b>Optical Drives</b>	Slimline DVD-ROM (8x24x)
	<b>Form Factor</b>	Rack 4U, 7 inches

### Product Configuration Wizard

#### Step 7 – add Host Based Data Replication

HP OpenView Storage Mirroring (SM) is an ideal entry host-based software product for IP networks. SM does not require high bandwidth Fibre Channel networks, high capacity replication and zero down time service levels. Storage Mirroring provides near real-time full application or file recovery up to the last byte replication. SM is an excellent choice for low bandwidth; low storage volume changes and meets business recovery goals within tens of minutes or hours. The immediate return on investment is realized in the reduced management cost associated with branch or small offices networks.

Product Highlights:

- High availability with Microsoft Windows 2000/NT/2003 servers
- Application aware and supported with Exchange, SQL and Oracle
- Host-based remote storage copy with TCP/IP networks
- Data distribution one-to-many or 'fan-out' to multiple destinations
- Data migration utility for transferring large data projects
- Centralize backup, data protection and recovery operations
- Built in scheduler for off hours replication
- Built in network bandwidth utilization management
- Disaster recovery between source and destination failover sites
- Powered by NSI Software's Double-Take patented 'Sequential Transfer Asynchronous Replication' technology

Sequential transfer maintains write sequential across multiple files for data integrity

#### Step 8 – add a Tape Backup Solution

##### Tape Drives

**NOTE:** External tape devices, including both tape drives and tape arrays/enclosures, can be directly connected to the VHDCI SCSI port located on the back of the server. Use of a SCSI adapter to connect these devices is optional, not required.
