RESELLER VERSION MODELS

Prosignia 200

ProLiant 1600

ProLiant 1850R

Compaq Prosignia and ProLiant Firewall Servers are delivered on specific configurations of these servers.

Overview

Compaq provides its Authorized Resellers with tested, recommended configurations and part numbers for the Compaq Prosignia and ProLiant Firewall Servers.

Compaq markets its Prosignia and ProLiant Firewall Servers to customers as fully integrated firewall solutions. Compaq recommends that customers contact their Compaq Authorized Reseller to determine the configurations that are most appropriate for their environment. Recommended configurations are being provided only to Compaq Authorized Resellers to enable Resellers to more confidently help their customers plan and deploy their security environments.

Description

The Compaq Prosignia and ProLiant Firewall Servers are a complete family of pre-tested solutions that provide secure protection of corporate networks and safe access to the Internet. Compaq Prosignia and ProLiant Firewall Servers include industry-standard software from leading computing security vendor AXENT Technologies, Inc. with additional security software optionally available from Computer Associates (CA). Compaq servers occupy a commanding position in the Internet server market, providing the foundation for these robust, reliable and highly integrated security solutions.

The Compaq Prosignia and ProLiant Firewall Servers–AXENT Series are available in three configurations:

- Specifically designed for small/medium businesses, municipalities, schools or remote offices, the Compaq Prosignia 200 Firewall Server with Raptor Firewall 5.0 for NT (100 users) provides firewall security at an affordable price.
- The Compaq ProLiant 1600 Firewall Server with Raptor Firewall 5.0 for NT (250 users) provides high-level firewall security for medium-sized businesses and remote offices. It allows for future scalability.
- The Compaq ProLiant 1850R Firewall Server with Raptor Firewall 5.0 for NT (unlimited users) offers larger enterprise customers proven security without sacrificing flexibility or scalability.

Compaq Prosignia and ProLiant Firewall Servers are Ready to Set Up and Deploy

Compaq Prosignia and ProLiant Firewall Servers have been tested to enable the reliable and consistent performance of the server hardware, operating system and Internet security server software, Raptor Firewall 5.0 for NT and (optionally) CA InocuLAN[®] 4.0 for Windows NT.

Raptor Firewall 5.0 for NT from AXENT Technologies

Raptor Firewall for NT (formerly named Raptor EagleNT) is an enterprise-level, bi-directional firewall application. Its access privileges can be fully configured to apply corporate security rules. Raptor Firewall for NT uses its management console, Hawk. It also offers full Virtual Private Network capabilities (firewall-to-firewall and mobile-user-to-firewall). Firewall-to-firewall VPN is available as a standard feature; mobile-user-to-firewall VPN requires an optional software component (RaptorMobile) on the client side. Raptor Firewall for NT also allows remote monitoring and multiple site management from one location.

CA InocuLAN 4.0 for Windows NT (optional)

CA InocuLAN 4.0 is a server-based anti-virus solution for Windows NT networks, offering extensive enterprise management and virus protection. Its features include:

- Real-time cure: immediate notification and cure of viruses, including macro viruses
- Periodic update to provide the latest virus protection
- Virus protection for Internet downloads and e-mail attachments

Built-in Management

Raptor Firewall for NT network management features include full Simple Network Management Protocol (SNMP) support through configuration from the Hawk graphical user interface (GUI), on Raptor Firewall for NT configurations.

SERVICE AND SUPPORT

Compaq Services provides a wide range of service offerings, including a three-year limited warranty¹, fully supported by a worldwide network of resellers and service providers, lifetime toll-free 7 x 24 hardware technical phone support, and Compaq Service and Support Programs available on a worldwide basis. Compaq does not provide software installation and support. Compaq Authorized Resellers should contact the software manufacturer for additional support.

HOW TO PURCHASE

Compaq products can be purchased through your existing Compaq Authorized Channel. Third party software products should be purchased through your existing method of procurement. For more information on Internet Solutions, visit www.compaq.com/internet, www.compaq.com/activeanswers, and www.compaq.com/clubweb.
